Introduction	1
Aim of the work	4
Review of literature	5
I- Nosocomial infection :	
- Incidence and frequency of nosocomial infection	5
- Types of nosocomial infection	6
- Classification of nosocomial infection	7
- Risk factors for nosocomial infection	9
II- Patients at risk in intensive care unit (ICU):	
- Introduction	14
- Sources of infection in ICU	15
- Types of infection in ICU	17
III- Anti-microbial drug resistance in the intensive care unit.	
- Introduction	31
- Choice of anti-microbial therapy	32
- Causes of emergence and dissemination of anti-microbial resistance.	35
- Methicillin resistant Staphylococci. aureus	36
- Vancomycin resistant enterococci	39
- Drug resistant gram negative bacilli	44
- Drug resistant Mycobacterium tuberculosis	47

- Resistant Candida.....	48
- Role of the microbiologic laboratory in detection of multi-resistant organisms.	49
IV- Sterilization and disinfection	
- Different methods of sterilization.	64
- Selection of disinfection procedure.....	71
- Factors affecting the activity of disinfectants.....	72
- Classes of disinfectants.....	75
- Problems with disinfection of health care equipment	87
- Microorganisms resistance to antiseptics and disinfectants...	88
V – infection control program in an ICU	
- Introduction.....	100
- Establishment of an infection control program.....	101
- Measures against the most specific infection in an ICU.....	116
Material and methods.....	121
Results.....	137
Discussion.....	166
Summary.....	179
Recommendations.....	184
References.....	185
