	<i>Page</i>
Chapter I : Introduction	
I.1. General Introduction	1
I.2. Literature Survey	10
I.3. Aim of Work	17
Chapter II: Theoretical Review and Calculation Methods	
II.1. Electrical conduction in solids.....	18
II.1. (a) DC-Conductivity	18
II.1.(b) AC-Conductivity	21
II.1. (c) Dielectric properties of solids.....	22
Chapter III : Experimental	
III.1. Materials	25
III.2. Properties of used commercial polyester	26
III.3. Synthesis of polyester-metal composites.....	26
III.4. Measurement and Instrumentation	27
III.4. (a) Fourier Transform-Infrared Spectra	27
III.4. (b) Thermal Analysis (DTA-TG) Measurements.....	27
III.4. (c) Thermal Mechanical Analysis (TMA).....	28
III.4. (d) Electrical Conductivity Measurements	28
III.4. (e) Seebeck Coefficient Measurements	29
III.4. (f) Determination of The Chemical durability of The	
Composites.	29
III.4. (f-i) Attacking Solution.....	29
III.4. (f-ii) Determination of the weight loss of	
polymer and composites.....	30
III.4. (f-iii) Determination of durability by using FT-IR	30
