

CONTENTS

I. INTRODUCTION

Genetic Principles	1
Haemopoiesis	5
Erythropoiesis	10
Hemoglobin	21
Red cell metabolism	25
Red cell breakdown	28
Red cell Kinetics	31
Physiology of Red blood cells	34
Function of Red cells	39
Red cell values in infancy and childhood	42

II. AIM OF THE WORK	45
---------------------------	----

III. DISCUSSION	45
-----------------------	----

*DISORDERS OF R.B.Cs.

1. Anaemia	45
The principles in the diagnosis of anaemia	55
The physiological anaemia of infancy	60
Megaloblastic anaemia of infancy	63
Iron deficiency anaemia	66
Aplastic anaemia	71
Haemolytic anaemias	76
Hereditary Spherocytosis	78
Hereditary elliptocytosis	83
Enzyme deficiency haemolytic anaemia.....	85

Paroxysmal nocturnal haemoglobinuria.....	94
Sickle cell anaemia	99
Thalassaemia	100
Anaemia with chronic renal failure	119
2. Polycythaemia	122
Effect of anaemia and polycythaemia on the brain (Brain anoxia).....	131
3. Methemoglobinaemia	134
4. Sulfhaemoglobinaemia	140
5. Bone marrow transplantation.....	141
IV. SUMMARY AND CONCLUSIONS	147
Haemopoiesis	147
Function of R.b.c.s.	149
Anaemia	149
Polycythaemia	154
V. REFERENCES.....	156
VI. ARABIC SUMMARY ..
