

CONTENTS

	Page
Review of literature	
❖ Cell Cycle	1
* Cell cycle checkpoints	2
• G ₁ S checkpoint	2
- p53 & Malignancy	2
- Cyclin-cyclin dependent kinases	6
- Cyclin-dependent kinase inhibitors	6
- Retinoblastoma protein	7
• Progression through S phase	7
• G ₂ M checkpoint	8
❖ Oncogens & Tumor suppressor genes	10
❖ Apoptosis	12
❖ Fas/FasL System	16
* Apoptosis signaling via Fas	18
* Regulation of cellular response to Fas	20
* Immune Regulatory Function of Fas System	21
* Human Fas-splicing variant of mRNA	22
* Fas splicing variants coding for soluble Fas proteins	24
* Biological Functions of soluble Fas (sFas) molecules	25
❖ Cancer Bladder	28
* Normal Bladder Urothelium	28
* Preneoplastic Proliferative Abnormalitis	29
* Urothelial Carcinoma	30
❖ Bilharzial Cancer Bladder	33
* Schistosomiasis	33
* Pathogenesis of Bilharzial Cancer Bladder	34
❖ Fas/FasL System & Cancer Bladder	37
Aim of Work	40
Material & Methods	41
Results	53
Discussion	77
Summary & Conclusion	84
References	87
Appendix	
Arabic summary
