	Page
INTRODUCTION AND AIM OF WORK.	1
REVIEW.	
-Oestrogens.	3
-Biochemical changes in patients with coronary heart disease.	10
-Estrogen and apolipoprotein synthesis.	27
-Coronary artery disease markers.	35
-Estrogen as coronary artery disease marker.	36
MATERIAL AND METHODS.	49
-Estimation of plasma glucose.	56
-Estimation of serum triglycerides.	58
-Estimation of total serum cholesterol.	61
-Estimation of high density lipoprotein cholesterol.	64
-Estimation of low density lipoprotein cholesterol.	67
-Estimation of serum estradiol.	71
-Statistical analysis.	76
RESULTS.	79
ANALYSIS OF RESULTS.	96
DISCUSSION.	103
SUMMARY.	112
REFERENCES.	114
ARABIC SUMMARY.
