INTRODUCTION	
Corrosion inhibition -----	3
Corrosion behavior of C-steel in aqueous solutions -----	5
Corrosion behavior of nickel in aqueous solutions -----	21
Corrosion behavior of zinc in aqueous solutions -----	27
Natural products as corrosion inhibitors for metals and alloys ----	33
AIM OF THE WORK -----	38
CHAPTER (I) Inhibition of General Corrosion of C-steel, Nickel & Zinc in Different Aqueous Media Using Extracts of Lawsonia, Ficus & Opuntia	
(A) Introduction -----	39
(B) Experimental -----	40
Cell -----	40
Working electrodes -----	40
Electrolytes -----	41
Preparation and extraction of inhibitors -----	41
Lawsonia (L). -----	41
Ficus (F). -----	42
Opuntia (S). -----	44
Polarization technique -----	44
(C) Results -----	46
(D) DISCUSSION PART I Inhibition of C-steel corrosion in different aqueous media using naturally occurring substances.	
1.1. Lawsonia extract (L) -----	49
1.1.a Acidic medium -----	49
1.1.b Neutral medium -----	50
1.1.c Alkaline medium -----	51

	Page
1.2. Ficus extract (F) -----	53
1.2.a Acidic medium -----	53
1.2.b Neutral medium -----	54
1.2.c Alkaline medium -----	54
1.3. Opuntia extract (S) -----	55
1.3.a Acidic medium -----	55
1.3.b Neutral medium -----	56
PART II Inhibition of nickel corrosion in different aqueous media using naturally occurring substances.	
2.1. Lawsonia extract (L) -----	60
2.1.a Acidic medium -----	60
2.1.b Neutral medium -----	60
2.1.c Alkaline medium -----	61
2.2. Ficus extract (F) -----	62
2.2.a Acidic medium -----	62
2.2.b Neutral medium -----	62
2.2.c Alkaline medium -----	63
2.3. Opuntia extract (S) -----	64
2.3.a Acidic medium -----	64
2.3.b Neutral medium -----	64
PART III Inhibition of zinc corrosion in different aqueous media using naturally occurring substances.	
3.1. Lawsonia extract (L) -----	69
3.1.a Acidic medium -----	69
3.1.b Neutral medium -----	69
3.1.c Alkaline medium -----	70
3.2. Ficus extract (F) -----	71
3.2.a Acidic medium -----	71
3.2.b Neutral medium -----	71
3.2.c Alkaline medium -----	72
3.3. Opuntia extract (S) -----	72
3.3.a Acidic medium -----	72
3.3.b Neutral medium -----	73

CHAPTER II Pitting corrosion of C-steel, Nickel & Zinc Metals and its inhibition by Lawsonia, Ficus & Opuntia	
(A) Introduction -----	78
(B) Experimental -----	79
(C) Results -----	80
(D) Discussion -----	82
I) Effect of some natural compounds on the pitting corrosion of C-steel under potentiodynamic anodic polarization	84
II) Effect of some natural compounds on the pitting corrosion of nickel under potentiodynamic anodic polarization	85
III) Effect of some natural compounds on the pitting corrosion of zinc under potentiodynamic anodic polarization	86
CHAPTER III Mechanism of inhibition	
Introduction -----	88
1. Lawsonia extract -----	89
1.a Mode of adsorption -----	89
1.b Mechanism of inhibition -----	90
2. Ficus extract -----	93
2.a Mode of adsorption -----	93
2.b Mechanism of inhibition -----	93
3. Opuntia extract -----	95
3.a Mode of adsorption -----	95
3.b Mechanism of inhibition -----	95
SUMMARY & CONCLUSIONS -----	98
