Abstract	ii
Thesis Organization	iii

Chapter 1 Introduction & Literature Survey

1.1 Introduction	1
1.2 The Aim of the Present Work	10
1.3 Literature Survey	11

Chapter 2 Theoretical Principles

2.1 The Chemical Structure of Polymers	43
2.2 Optical Absorption Spectroscopy	44
2.2.1 Molecular Energy Levels	44
2.2.2 Electronic Transitions in Organic Molecules	46
2.2.3 Beer-Lambert Law	48
2.2.4 Absorption Spectra	49
2.2.5 Light Absorption by Organic Laser Dyes	50
2.3 The Band Models for Amorphous Solids	51
(2.3.1) Cohen-Fritzsche-Ovshinsky (CFO) model	52
(2.3.2) Davis and Mott model	53
(2.3.3) Street and Mott model	54
2.4 The Mobility Edge	55
2.5 Optical Transitions in Amorphous Solids	55
2.6 Photoluminescence Spectroscopy	59
2.6.1 Jablonski Diagram	60
2.6.2 Radiative transitions	61
2.6.3 Excimers and Exciplexes	61
2.6.4 Non-Radiative Transitions	63
2.6.5 Fluorescence Intensity	64
2.6.6 Fluorescence Quantum Yield	64
2.6.7 Stokes Shift	65
2.6.8 Processes Affecting the Fluorescence of Organic Laser Dyes	66
2.6.9 Fluorescence Anisotropy	69
2.7 Fluorescent Solar Concentrators (FSCs)	72
2.8 Factors Affecting the FSC Performance	74
2.8.1 Properties of Fluorescent Molecules	74
2.8.2 Properties of the Matrix Substrate	76

	Contents
2.9 Analysis of the FSC Operation	79
2.9.1 Conversion Efficiency	79
2.9.2 Transport Efficiency	80

Chapter 3 Experimental Techniques

3.1 Sample Preparation	81
3.1.1 Preparation of Fluorescent PMMA Thick Films	81
3.1.2 Preparation of Transparent (PMMA/SiO ₂) Hybrid Thick Films	82
3.1.3 Preparation of Fluorescent (PMMA/SiO ₂) Hybrid Thick Films	84
3.1.4 Preparation of Bended Fluorescent Solar Concentrators (BFCs)	84
3.2 X-ray Diffraction Characterization	84
3.3 FT-IR Spectral Characterization	86
3.4 Optical Absorption and Transmission Spectroscopy	86
3.5 Fluorescence Spectroscopy	86
3.6 Specular Reflection Spectroscopy	88
3.7 Indoor Testing of Photostability	88
3.8 Outdoor Testing of BFSCs	89
3.9 Data Analysis	90

Chapter 4 Results & Discussion

Section (1): Photophysical Properties of Fluorescent PMMA Films	91
4.1.1 FT-IR Spectral Characterization	91
4.1.2 Optical Absorption Spectroscopy	93
4.1.3 Fluorescence Spectroscopy	95
4.1.4 Interband Transitions	99
4.1.5 Transmission Spectroscopy	104
4.1.6 Refractive Index and Guiding properties	104
4.1.7 Dye Self-absorption	111
4.1.8 Photostability	116
4.1.8.1 Photoresponse of the Optical Absorption Spectra	116
4.1.8.2 Photoresponse of the Fluorescence Spectra	121

	Contents
4.1.9 Thermal Stability	124
4.1.9.1 Temperature Effect on the Optical Absorption Spectra	124
4.1.9.2 Temperature Effect on the Fluorescence Spectra	124
4.1.10 Optical Efficiency	127
4.1.11 Section Summary	128
Section (2): Photophysical Properties of PMMA/SiO₂ hybrids	129
4.2.1 FT-IR Spectral Characterization	129
4.2.2 Optical Absorption Spectroscopy	132
4.2.3 Interband Transitions	132
4.2.4 Refractive Index and Guiding Properties	138
4.2.5 Transmission Spectroscopy	140
4.2.6 Section Summary	140
Section (3): Tailoring of Efficiently Fluorescent PMMA/SiO₂ Hybrids for Solar Energy Conversion	143
4.3.1 FT-IR Spectral Characterization	143
4.3.2 Incorporation Models of Organic Laser Dyes in PMMA and Hybrid PMMA/SiO₂ Hosts	146
4.3.3 Optical Absorption Spectroscopy	147
4.3.4 Fluorescence Spectroscopy	149
4.3.5 Interband Transitions	154
4.3.6 Transmission Spectroscopy	160
4.3.7 Refractive Index and Guiding properties	160
4.3.8 Dye Self-absorption	167
4.3.9 Photostability	172
4.3.9.1 Photoresponse of the Optical Absorption Spectra	172
4.3.9.2 Photoresponse of the Fluorescence Spectra	178
4.3.10 Thermal Stability	181
4.3.10.1 Temperature Effect on the Optical Absorption Spectra	181
4.3.10.2 Temperature Effect on the Fluorescence Spectra	182
4.3.11 Optical Efficiency	185

4.3.12 Section Summary	185
-------------------------------------	-----

Chapter 5

Application (1): Performance Evaluation of Thick FSC Films as Photoselective Greenhouse Coverings	187
--	-----

5.1.1 The Primary Reaction Centre of Photosynthesis	188
--	-----

5.1.2 Light Harvesting of FSC photoselective Films	188
---	-----

5.1.3 Effective Transmission of FSC Photoselective Greenhouse Coverings	191
--	-----

5.1.4 Section Summary	198
------------------------------------	-----

Application (2): Performance Evaluation of Bended Fluorescent Solar Concentrators (BFSCs)	199
--	-----

5.2.1 Bended Fluorescent Solar Concentrators (BFSCs)	199
---	-----

5.2.2 Time variation of global solar radiation	200
---	-----

5.2.3 Effect of Tilt Angle on the Output of the PV Cell	200
--	-----

5.2.4 Outdoor Testing of BFSCs	200
---	-----

5.2.5 Section Summary	206
------------------------------------	-----

Conclusions	208
--------------------------	-----

References	210
