	Page
INTRODUCTION	i
CHAPTER I PARAMETRIC LINEAR PROGRAMMING	1
1.1 Parameters in the Right Hand Side of the Constraints	2
a) Dependence on a Scalar Parameter	2
b) Dependence on Several Parameters	4
1.2 Parameters in the Coefficients of the Objective Function	20
a) Dependence on a Scalar Parameter	20
b) Dependence on Several Parameters	25
CHAPTER II THEORY AND METHODS FOR SOLVING MULTI- OBJECTIVE LINEAR PROGRAMS	31
2.1 Formulation of Multi-objective Linear Programs	31
2.2 Theory of Multi-objective Linear Programs ..	34
2.3 Methods for Solving MOLPP	37
(i) First Method	38
a) Two Person-Zero Sum Game Approach	38
b) Normalization of the Pay-Off Matrix Entries	40
c) Decision-Maker Preferences	43
d) Summary of the Solution Technique	44
(ii) Second Method	48
a) b.c.s. Algorithm	48
b) A Method for Obtaining All Efficient Faces to MOLPP	51
c) The Algorithm of Solution	53
(iii) Third Method	59
a) A Method for Obtaining All Efficient Extreme Points	62
b) The Algorithm of Solution	67

CHAPTER III	MULTI-OBJECTIVE LINEAR PROGRAMS WITH PARAMETERS IN THE CONSTRAINTS	71
3.1	Problem Formulation	72
	a) The Set of Feasible Parameters	73
	b) The Solvability Set	74
3.2	The Stability Set of the First Kind	74
	a) Determination of the Stability Set of the First Kind	76
3.3	The Stability Set of the Second Kind	79
	a) An Algorithm for Decomposing the Solvability Set According to the Stability Sets of the Second Kind Together with the Determination of the Corresponding Efficient Points	79
CHAPTER IV	LARGE SCALE MULTI-OBJECTIVE LINEAR PROGRAMS	83
4.1	Dantzig-Wolfe Decomposition Method in Linear Programs	83
	a) Column Generation	86
	b) Development of the Decomposition Principle	87
	c) Dantzig-Wolfe Algorithm	91
	d) Modification for Unbounded Subsystem Constraint Sets	93
4.2	Decomposition Method for Solving Large Scale MOLPP	94
	a) Problem Formulation	94
	b) The Algorithm of Solution	95
