Chapter	
Acknowledgements .	
Introduction .	
I Preliminaries .	
I.1 Linear operators in a Hilbert space.....	1
I.2 Symmetric and self-adjoint operators.....	4
I.3 Deficiency indices.....	6
I.4 Spectrum.....	9
II $L^2$ -classification of second-order linear differential equations	
II.1 Second-order linear differential expressions.	13
II.2 Operators associated with the formally second-order differential expressions.....	17
II.3 The concept of deficiency indices and $L^2$ -classification.....	19
II.4 Limit-point case and some known results.....	26
II.5 Limit-circle case and some known results.....	35
III Strong limit-point and additional properties for the second-order linear differential equation.	
III.1 Strong limit-point case at $\infty$ .....	42
III.2 Some known results .....	51
III.3 Dirichlet and Conditional Dirichlet properties .....	53
III.4 Some known results .....	59
III.5 Application.....	64
Bibliography	
Arabic Summary.
