CHAPTER I	
INTRODUCTION	
I.1- Location.....	2
I.2- Previous Work.....	2
I.3 - Aim of study.....	6
I.3.1- Field Work.....	6
I.3.2- Laboratory and office works.....	7
I.3.3- Present work.....	7
CHAPTER II	
PHYSICAL SETTING	
II.1- Climatic Conditions.....	8
II.2- Geomorphic Setting.....	10
II.2.1- Red Sea Mountainous Unit.....	12
II.2.2- Sandstone Plateau.....	12
II.2.3- Tectonic Depressions.....	13
II.2.4- Tertiary Volcanic Ridges.....	13
II.2.5- The piedmont and coastal plain.....	13
II.3- Geologic setting.....	13
II.3.1- Precambrian basement rocks.....	13
II .3.1.1- Gneisses and metasediments.....	15
II .3.1.2- Ophiolitic serpentinites and related rocks.....	15
II .3.1.3- Metagabbros.....	15
II .3.1.4- Metavolcanics.....	15
II .3.1.5- Old granitoids.....	17
II .3.1.6- Young Granites.....	17

II.3.1.7- Ring complex.....	17
II.3.2- Cretaceous sedimentary rocks.....	17
II.3.2.1- Abu-Aggag Formation.....	19
II.3.2.2- Timsah Formation.....	19
II.3.2.3- Um-Baramil Formation.....	19
II.3.3- Quaternary Deposits.....	20

CHAPTER III

PETROGRAPHY AND GEOCHEMISTRY OF ALTERED ROCKS

III.1- Petrography.....	21
III.1.1- Metavolcanics.....	21
III.1.2- Metagabbros.....	23
III.1.3- Younger granites and syenites.....	23
III.2- Geochemistry of altered rocks.....	26
III.2.1- Mobility of elements and water-rock interaction.....	29
III.2.2- X-Ray Diffraction patterns.....	33

CHAPTER IV

GROUNDWATER CHEMISTRY.....

IV.1- Hydrogeological setting.....	40
IV.1.1- Quaternary alluvial aquifer.....	41
IV.1.2- Upper Cretaceous Nubia sandstone aquifer.....	44
IV.1.3- Pre-Cambrian basement aquifer.....	45
IV.2- Hydrogeochemistry of Quaternary aquifer.....	47
IV.2.1- Total Salinity.....	47
IV.2.1.1-Major ions-groundwater salinity relationship.....	52
IV.2.2.1- Major ions distribution in the Quaternary Aquifer.....	54
IV.2.2.2- Distribution of minor and trace components.....	62
IV.2.2.3- Hypothetical salts assemblages.....	68

IV.2.2.4- Chemical water type.....	70
IV.2.2.5- Hydrochemical ratios.....	71
IV.2.2.6- Sources of salinization of the Quaternary aquifer.....	75
IV.2.2.7- Genetic classification of groundwater.....	77
IV.2.2.8- Hydrochemical equilibrium model	77
IV.3- Hydrogeochemistry of Upper Cretaceous Nubia Sandstone aquifer.....	81
IV.3.1- Total Salinity.....	81
IV.3.1.1- Major ions-Groundwater salinity relationships	81
IV.3.2- Major ions distribution in Nubian Sandstone aquifer.....	86
IV.3.3- Distribution of minor and trace components.....	90
IV.3.4- Hypothetical salts.....	98
IV.3.5- Groundwater chemical type.....	103
IV.3.6- Hydrochemical parameters.....	106
IV.3.7- Genetic classification of groundwater.....	107
VI.5.3- Major ions – groundwater salinity relationships.....	108
VI.4- Hydrogeochemistry of Pre-Cambrian aquifer	111
VI.4.1- Total Salinity.....	111
IV.2.1.1-Major ions-groundwater salinity relationship.....	114
IV.4.2- Major ions distribution in the Pre-Cambrian aquifer.....	116
IV.4.3- Distribution of minor and trace components.....	122
IV.4.4- Hypothetical salts assemblages.....	130
IV.4.5- Groundwater chemical types.....	133
IV.4.6- Hydrochemical parameters.....	135
IV.4.7- Genetic classification of groundwater.....	137
IV.4.8- Groundwater composition and rock weathering.....	140
IV.4.9- Hydrochemical equilibrium model.....	145

CHAPTER V

WATER AVAILABILITY TO USES.....	147
V.1- Drinking and domestic purposes.....	147
V.2-Livestock and poultry uses.....	150
V.3- Laundry uses.....	152
V.4- Agricultural uses.....	153
Summary, conclousion and recommendations.....	161
References.....	173
Appendix	183
Arabic summary	1
