INTRODUCTION	1
GENERAL PRINCIPLES OF NEONATAL PHARMACOKINETICS	3
I. Drug absorption	3
II. Drug distribution	4
III Drug metabolism	6
IV. Drug excretion	7
FOETAL THERAPEUTICS	9
DRUGS OF RESUSCITATION	13
I. Epinephrine	13
II. Naloxone	14
III. Sodium bicarbonate	15
IV. Glucose	16
MANAGEMENT OF RESPIRATORY DISORDERS	18
I. Oxygen therapy	18
II. Surfactant replacement	22
III Theophylline	25
IV. Doxapram	26
FLUID THERAPY	28
I. Dehydration	28
II. Blood transfusion & Exchange transfusion	32
III. Human serum albumin infusion	35
THE EFFECT OF DRUGS IN BREAST MILK	36
CARDIOVASCULAR DRUGS	39
I. Cardiac glycosides	39
II. Furosemide	43
III Indomethacin	45
IV. Prostaglandins	49
V. Sodium nitroprusside	51
VI Captopril	53
VII. Dopamine	54
ANTIMICROBIAL CHEMOTHERAPY	55
I. Penicillin G	55
II Ampicillin	57

	Page
III. Gentamicin	59
IV Chloramphenicol	62
V. Trimethoprim-Sulphamethoxazole	65
VI Cefotaxime	67
VII. Vancomycin	68
VIII. Amphotericin B	69
PHOTOTHERAPY	71
CENTRAL NERVOUS SYSTEM DRUGS	76
I. Phenobarbitone	76
II Diphenyl hydantonin	77
III. Primidone	79
ENDOCRINE DRUGS	81
I. Congenital hypothyroidism	81
II Neonatal thyrotoxicosis	83
III. Neonatal hypoglycemia	83
IV. Neonatal hypocalcemia	87
V. Congenital adrenal hyperplasia	89
VITAMINS	91
I. Vitamin K	91
II. Rickets of prematurity	92
III. Pyridoxine (vitamin B ₆)	94
IV. Vitamin E	95
V. Anaemia of prematurity	98
