ACKNOWLEDGMENT.....	I
PUBLICATIONS.....	II
ABSTRACT.....	III
TABLE OF CONTENTS.....	IV
LIST OF TABLES.....	IX
LIST OF FIGURES.....	X

Chapter 1

INRODUCTION

Overview.....	1
Ion selective electrode.....	2
1.1.Theory.....	2
1.2.Types of Membranes.....	4
1.2.1.solid membranes.....	6
1.2.1.1.Crystalline membranes.....	6
1.2.1.2.Amorphous membranes.....	6
1.2.1.2.1.Glass-membranes	6
1.2.1.2.2.Polymeric membranes	8
1.2.1.2.3.Carbon paste membranes	9

1.2.1.2.4.Modified-membranes	9
1.2.6.Liquid-membranes	11
1.3.Characterization of an ion-selective electrode.....	12
1.3.1.Selectivity.....	12
1.3.1.1.Mixed solution methods.....	14
1.3.1.1.1.Fixed interference method (FIM).....	14
1.3.1.1.2.Fixed primary ion method (FPM).....	14
1.3.1.1.3.Two solutions method (TSM).....	15
1.3.1.1.4.Matched potential method (MPM).....	15
1.3.1.2.Separate solution methods.....	16
1.3.1.2.1.Separate solution method ($a_A = a_B$).....	16
1.3.1.2.2.Separate solution method ($E_A = E_B$).....	17
1.3.2.Slope	17
1.3.3.Response time.....	18
1.3.4.Linear Range.....	19
1.3.5. Limit of detection.....	19
1.4. Calibration.....	20
1.5.Measurement techniques.....	21
1.5.1.Direct Potentiometry.....	21
1.5.2.Incremental Methods.....	22
1.5.3.Potentiometric titration	23
1.6.Problems with ISE measurements.....	24

1.7.Application of ISE's	25
1.7.1.Environmental applications	25
1.7.2.Pharmaceutical applications.....	28
1.7.3.Industrial applications.....	34

Chapter 2

A Novel Histamine H₁– Receptor Antagonist “Fexofenadine” - Selective Polymeric Membrane Sensor for its Determination in Dosage Forms.

2.1.Introduction	37
2.2.Experimental	39
2.2.1. Reagents and materials.....	39
2.2.2. Apparatus.....	40
2.2.3. Preparation of ion-pair.....	40
2.2.4. Preparation of the membrane.....	41
2.2.5. Construction of the electrode.....	41
2.2.6. Calibration of the sensor.....	42
2.2.7. Determination of fexofenadine hydrochloride in “Telfast” tablets.....	42
2.2.8. Eosin spectrophotometric method for determination of fexofenadine....	43
2.3.Results and discussion	43
2.3.1.Potentiometric performance of the fexofenadine sensor.....	43
2.3.2. Influence of the membrane composition.....	44

2.3.3. Effect of plasticizer type on the sensor response.....	45
2.3.4. Effect of pH on the response of fexofenadine sensor.....	46
2.3.5. Effect of the concentration of the back-fill solution.....	46
2.3.6. Effect of diverse ions on the fexofenadine sensor.....	47
2.3.7. Response time.....	49
2.3.8. Determination of fexofenadine hydrochloride in pure solution and in 'Telefast' tablets.....	50
2.3.9. Determination of fexofenadine by potentiometric titration.....	50
2.4. Conclusion.....	51

Chapter 3

Novel coated graphite cadmium-selective electrodes based on its tetraiodo- and tetrabromo- ion pairs with cetylpyridinium ion

3.1. Introduction.....	70
3.2. Experimental.....	72
3.2.1. Reagents and materials.....	72
3.2.2. Apparatus.....	73
3.2.3. Preparation of the ion-pairs.....	73
3.2.4. Preparation of the coated graphite electrodes.....	73
3.2.5. Calibration of the electrodes.....	74
3.2.6. Separation of cadmium from the sample matrix using PUF column.....	75
3.2.7. Determination of cadmium in different matrices.....	75
