Chapter 1.	Introduction.....	1
1-1.	General Introduction	1
1-2.	Structure of Titanium Oxides.....	1
1-3.	Properties of TiO ₂ and its Applications.....	4
1-4.	Preparation of Titanium Dioxides.....	10
1-4.a.	The Sulphate process	10
1-4.b.	Vapour phase oxidation of the tetrachloride..	10
1-4.c.	Synthesis of novel TiO ₂ nanoparticles using micelle-template method.....	10
1-5.	Mixed (Dual) Oxides.....	12
1-6.	Supported Metal Oxides	12
1-6.1.	Preparation of supported metallic catalysts ...	15
1-6.1.a.	Conventional method.....	15
1-6.1.b.	Micelle-template method	16
1-6.2.	Catalyst structure as key to activity	16
1-6.3.	Importance of supported metal oxides	16
1-6.4.	Treatment of various types of pollution by supported metal oxides	17
1-6.5.	Recent studies on supported metal oxides ...	20
1-6.6.	Recent studies on vanadium oxide supported on titanium dioxide	25
1-7.	Effect of Hydroxyl Groups on Surface Metal Oxides.....	28
1-8.	Surface Acidic Properties	30
1-9.	Theoretical Review and Calculation Methods...	31
1-9.I.	Nitrogen Adsorption Measurements.....	31

	Page
1-9.I.a- Adsorption of vapours by solids	31
1-9.I.b- Types of adsorption isotherms	32
1-9.I.c- Types of hysteresis loops	34
1-9.I.d- Classification of pore size	36
1-9.I.f- Estimation of the specific surface area	37
1-9.I.f-1. BET method	37
1-9.I.f-2. Analysis of the nitrogen adsorption isotherms by means the t-method	39
1-9.II- X-ray Diffraction Analysis	43
Chapter 2. Experimental	44
2-1. Materials	44
2-2. Material Preparations	44
2-2.i- Preparation of original TiO_2 by conventional method	44
2-2.ii- Synthesis of novel TiO_2 using micelle-template method in hydrothermal conditions	45
2-2.ii-a- Preparation of TiO_2 by cationic surfactants	45
2-2.ii-b- Preparation of TiO_2 by anionic surfactant	45
2-2.ii-c- Preparation of TiO_2 by poly-ol groups compounds	46
2-2.iii- Synthesis of vanadia-titania using micelle- template method in hydrothermal conditions	47
2-2.iii-a- Preparation of vanadia-titania by cationic surfactants	47
2-2.iii-b- Preparation of vanadia-titania by anionic surfactant	48

	Page
2-2.iii-c- Preparation of vanadia-titania by poly-ol groups compounds.....	48
2-3. Physicochemical Characterization of Materials...	49
2-3.1- X-ray Diffraction Analysis (XRD).....	49
2-3.2- Fourier Transform Infrared Spectra (FTIR)...	49
2-3.3- Differential Thermal Analysis-Thermogravimetry (DTA-TG).....	49
2-3.4- Scanning Electron Microscope (SEM).....	49
2-3.5- Surface Acidity Measurements	50
2-3.6- Nitrogen Adsorption Measurements.....	50
2-3.6-a- Pretreatment of the adsorbent	51
2-3.6-b- Determination of adsorption isotherm.....	53
2-3.7- Catalytic Activity Measurements	53

Chapter 3. Results and Discussion

PART (A)

3-A. Surface Properties of Various Titania and their Supported Vanadia Samples.....	55
3-A.1. Surface Properties of TiO_2 and $\text{V}_2\text{O}_5/\text{TiO}_2$ Synthesized by Anionic Surfactant.....	56
3-A.1.a. Nitrogen adsorption-desorption isotherms...	56
3-A.1.b. Pore structure assessment (t-plot method)...	62
3-A.2. Surface Properties of TiO_2 and $\text{V}_2\text{O}_5/\text{TiO}_2$ Synthesized by Cationic Surfactant.....	65
3-A.2.a. Nitrogen adsorption-desorption isotherms...	65
3-A.2.b. Pore structure assessment (t-plot method)...	68
3-A.3. Surface Properties of TiO_2 and $\text{V}_2\text{O}_5/\text{TiO}_2$	

	Page
Synthesized by Poly-ol group's Compounds	70
3-A.2.a. Nitrogen adsorption-desorption isotherms	70
3-A.2.b. Pore structure assessment (t-plot method)	73

PART (B)

3-B.	X-ray and Thermal Analysis	76
3-B.1.	X-ray and thermal analysis results of nanostructured TiO ₂ assembled by cationic surfactants	76
3-B.2.	X-ray and thermal analysis results of nanostructured TiO ₂ assembled by anionic surfactants	83
3-B.3.	X-ray and thermal analysis results of nanostructured TiO ₂ assembled by Poly-ol group's compounds	88

88

PART (C)

3-C.	Scanning Electron Microscopy	101
-------------	------------------------------	-----

PART (D)

3-D.	FTIR Study of TiO ₂ Surfaces and when Incorporated with Vanadium during Synthesis	113
-------------	--	-----

PART (E)

3-E.	Acidic Properties of various TiO ₂ and Vanadium Incorporated TiO ₂ Samples	128
-------------	--	-----
