

Table of contents

	Page
Introduction and aim of the work.....	1
Review of literature	
Chapter I	
• Definitions of bronchial asthma	4
• Epidimiology.	5
• Types of asthma	9
• Genetic factors in asthma.	11
• Asthma aetiology.	13
Chapter II	
• Pathogenesis of asthma.	24
- Airway hyperresponsiveness.	24
- The neurogenic mechanisms in asthma.....	26
- Airway inflammation.	29
• Inflammatory cells involved in asthma.....	37
• Inflammatory mediators in asthma.	51
Chapter III :	
• Cytokines.	56
- Cytokines receptors.	58
- Immune regulation by cytokines.	59
- Interleukins.	62
- Cytokines and bronchial asthma.	63
- Interleukin – 13 (IL-13)	66
- Other cytokines involved in asthma pathogenesis.	73
Chapter IV	
• Pathophysiology of asthma and clinical physiologic correlation.....	81
• The presentation of bronchial asthma.....	84

	Page
• Complication of bronchial asthma.	91
• Investigations of asthma.	95
• Differential diagnosis of asthma.	97
• Prognostic factors in asthma.	98
Subjects and methods.	100
Results and analysis of data	117
Discussion	141
Summary	163
Conclusions	167
Recommendations	168
References	169
