	Table of contents	I
	List of tables	III
	List of figures	V
	List of abbreviations	VI
	Introduction & aim of the work	VIII
	Review	
	Chapter One: <i>Neonatal Immunology</i>	
	Introduction	1
	Components of the immune system	1
	The origin and types of lymphocytes	1
	The materno-fetal immunologic relationship	5
	The immune system in the term infant	5
	The immune system in the preterm infant	9
	Chapter Two: <i>Neonatal Sepsis</i>	
	Colonization of the newborn	11
	Prevention of cross infection	12
	Assessment of infection in the neonate	13
	Investigations of neonatal sepsis	16
	Treatment and prevention	18
	Chapter Three: <i>Iron and its relation to immunity</i>	
	Iron metabolism	22
	Clinical features	25
	Manifestations of iron deficiency	25
	Laboratory features	26
	Effects of iron overload and iron deficiency on infection	27
	Effects of iron treatment on infection	29

Table of Contents (Cont.)

Chapter Four: <i>Zinc and its relation to immunity</i>	
Zinc metabolism and activities	31
Deficiency of trace elements	33
Absorption of zinc	34
Distribution of zinc	35
Metabolic functions of zinc	36
Zinc and immunity	37
Zinc deficiency	40
 Patients and Methodology.	
Materials and Methods	46
Statistical methods	60
 Results and Data Analysis	62
 Discussion	77
 Summary	93
 Conclusion	97
 Recommendation	99
 References	100
 Arabic Summary	1

Table	Title	Page
11	Mean iron, TIBC, Transferrin , IgG, IgM and chemotaxis in neonates with deficient and with normal zinc levels.	68
12	Number of septic and non septic neonates with deficient and with normal iron levels	69
13	Number of septic and non septic neonates with deficient and with normal zinc levels.	70
14	Comparison between iron deficient septic and non septic neonates.	70
15	Number of septic and non septic neonates with deficient & with normal zinc	71
16	Comparison between septic neonates with deficient and with normal zinc levels.	72
17	Comparison between zinc deficient septic and non septic neonates.	72
18	Comparison between iron level in four non septic groups.	73
19	Significance of TIBC level in four non septic groups.	73
20	Significance of Transferrin level in four non septic groups.	74
21	Significance of Zinc level in four non septic groups.	74
22	Significance of T.IgG level in four non septic groups.	75
23	Significance of T.IgM level in four non septic groups.	75
24	Significance of Chemotaxis level in four non septic groups.	76

List of figures

Figure	Title	Page
1	Comparison between No. of normal and deficient iron septic neonates	69
2	Comparison between No. of normal and deficient zinc septic neonates	70

List of Abbreviations

C	C	Complement
	CBC	Complete Blood Count
	CD	Cell Differentiation
	CRP	C-Reactive Protein
	CSF	Cerebrospinal Fluid
D	2,3 DPG	2,3 Diphosphoglycerates
E	ESR	Erythrocyte Sedimentation Rate
F	Fe+++	Ferric
	Fe++	Ferrous
	FT	Full Term
G	GALT	Gut Associated Lymphoid Tissue
	GBS	Group Beta Streptococci
	G6PD	Glucose 6 Phosphate Dehydrogenase
H	HLA	Histo-Compatibility Antigen
	HIV	Human Immunodeficiency Virus
I	Ig	Immunoglobulin
	IPPV	Intermittent Positive Pressure Ventilation
	IREBP	Iron responsive Element Binding Protein
	IRF	Iron Regulating Factor
L	LBW	Low Birth Weight
N	NEC	Necrotizing Enterocolitis
	NICU	Neonatal Intensive Care Unit
	NK-cells	Natural Killer Cells

List of Abbreviations (Cont.)

P	P	Probability
	PT	Preterm
R	RBCs	Red Blood Corpuscles
	RDS	Respiratory Distress Syndrome
S	SD	Standard Deviation
	SFD	Small For Date
T	TIBC	Total Iron Binding Capacity
	TPN	Total Parenteral Nutrition
	TTN	Transient Tachypnea of the Neonate
U	UIBC	Unsaturated Iron Binding Capacity
V	VLBW	Very Low Birth Weight
Z	Zn	Zinc
