

CONTENTS

	Page
PREFACE AND SUMMARY	
<u>CHAPTER I:</u> BASIC IDEAS	
1. Introduction	1
2. Physical Picture of a Shock Wave.....	1
3. Mathematical Picture for a Shock Wave....	4
4. The Rankine-Hugoniot Conditions.....	5
5. Eulerian and Lagrangian Approaches.....	10
6. Discretization in Computational Fluid....	
Dynamics.....	11
 CHAPTER II: SURVEY OF SOME NUMERICAL METHODS FOR SOLVING HYPERBOLIC EQUATIONS AND TREATING SHOCK WAVES. -	
1. Introduction	20
2. Review Some of the Explicit Methods for Numerical Solution.....	25
3. Stability Analysis.....	51
4. Explicit Artificial Viscosities.....	59

CHAPTER III: A SECOND ORDER ITERATIVE SCHEME
FOR SOLVING THE CYLINDRICAL SHOCK
PROBLEM

1. Introduction	67
2. The Iterative Scheme and Stability	68
3. Computations of the Cylindrical Shock Problem.....	71
REFERENCE AND BIBLIOGRAPHY ..
