	Pag
Chapter I Maximum Principles In Orinary Differential Equation	1
1.1 Introduction	1
1.2 The one-dimensional Maximum Principal	1
1.3 More General Differential Inequalities	5
1.4 The Generalized Maximum Principle	6
1.5 Uniqueness Results For Initial and Boundary Value Problems	10
1.5.1 Initial Value Problem	10
1.5.2 Boundary Value Problem	11
1.6 Approximation In Boundary And Initial Problems	15
1.6.1 Boundary Value Problem	15)
1.6.2 INITIAL VALUE PROBLEM	19
1.7 Nonlinear Operators	22
Chapter II Maximum Principles In Elliptic Problems	26
2.1 Introduction	26
2.2 Notations And Some Basic Definitions And Theorems	26
2.3 Maximum Principle For elliptic Inequalities	29
2.4 More General Differential Inequalities	33
2.5 Maximum Principle of E. Hopf	34
2.6 Uniqueness Theorem For Boundary Value Problems	38
2.7 The Generalized Maximum Principle	41

Pag

2.8 Approximation In Boundary Value Problems 47

2.9 The Phragmen-Lindelof Princiole 51

2.10 Nonlinear operators 63

Chapter III The P. Function For Solution of $\Delta u+f(u) = 0$ 69

3.1 Introduction 69

3.2 The one-dimensional Problem 69

3.3 Determination of P-Functions for Solutions of $\Delta u + \beta(u) = o$ 74

3.3.1 The Two-Dimensional Case 75

3.3.2 The Higher-dimensional Case 79

3.4 The Maximum Of P on D 84

3.4.1 The Two-Dimensional Case 84

3.4.2 Higher Dimensions 86

3.5 The maximum Of P at a Point Where $\Delta u = 0$ 89

3.5.1 Dirichlet Boundary Conditions 90

3.5.2 Neumann Boundary Conditions 97

Chapter IV Applications 102

4.1 Torsion Problem 102

4.2 Abound For The Efficiency ratio 112
