

CONTENTS

ACKNOWLEDGMENT.....	I
AIM OF THE WORK.....	II
ABSTRACT.....	III
CHAPTER - I :- Introduction and Literature survey	
I-1) History and principle uses of rubber.....	1
I-2) Preliminary note about rubber structure and processing.....	2
I-3) Pigment.....	6
I-4) Carbon black.....	7
I-5) Zinc Oxide.....	10
I-6) Conduction in high polymers.....	11
I-7) Effect of pressure on electrical properties of polymers.....	22
CHAPTER-II :- Experimental work	
II-1) Materials used in this work.....	25
II-2) Preparation of rubber blends.....	25
II-3) Electrical conductivity measurements.....	29

CHAPTER-III :- Results and Discussion

III-1) Polychloroprene and Acrylonitrile- Butadiene rubber blend.....	38
III-1-1) Electerical conductivity of ZnO/(CR+NBR) blends.....	38
III-1-2) Effect of static pressure on electerical conductivity of ZnO/(CR+NBR).....	43
III-1-3) Effect of carbon black concentration on electrical conductivity of FEF/(CR+NBR)....	45
III-1-4) Effect of static pressure on electerical conductivity of FEF/(CR+NBR).....	49
III-2) Natural rubber and Acrylonitrile-Butadiene rubber blend.....	54
III-2-1) Electerical conductivity of ZnO/(NR+NBR) rubber blend.....	54
III-2-2) Effect of carbon black on electerical conductivity of FEF/(NR+NBR) blend.....	57
Conclusion.....	64
References.....	65
