	<u>Page</u>
- INTRODUCTION AND AIM OF THE WORK	I
- ETIOLOGY :	3
* Neonatal congestive heart failure (CHF) present at or shortly after birth	3
* Neonatal CHF presenting during nursery course....	12
* CHF in early infancy with onset at 1-6 weeks.....	19
* Other rare causes of CHF in neonatal period	22
- PATHOPHYSIOLOGY:.....	24
* Volume-pressure Loading	24
* Depression of the inotropic state of the myocardium	26
* Alterations in chronotropic state of the heart ...	28
* Fetal circulation	29
* Role of fetal flow pathways and pulmonary vascular bed	31
* CHF in the fetus	39
* Clinical and biochemical changes-Adaptive mechanism	44
- DIAGNOSIS :	49
* History	49
* Physical examination	51
* Chest Roentgenogram	56
* Electrocardiogram	58
* Echocardiogram	59
* Radionuclear angiogram	62
* Cardiac Catheterization and angiography	63

- MANAGEMENT :	65
* Chart	66
* Cardiotonic drugs	71
* Diuretic therapy	73
* Other supportive measures	80
* Specific problems requiring additional CHF therapy	85
