

CONTENTS

SUMMARY	1
INTRODUCTION	1
N-hydroxyphthalimide	
Structure	1
<u>Chemical Reactions:</u>	4
1. Oxidation	4
i) With hydrogen peroxide	4
ii) With lead peroxide	4
2. Salt formation	5
3. Aminolysis	7
4. Hydrazinolysis	11
5. Ammonolysis	15
6. Hydrolysis	16
7. Alkyl and Aryl sulphonation	19
i) Alkyl sulphonation	19
ii) Aryl sulphonation	19
8. Aryl Carbamylation	20
9. Action of active methylene compounds (e.g phenyl acetic acid)	21
10. Action of Grignard reagents	21
11. Methylation	23
12. Aminomethylation	24
13. Acylation	25
14. Molecular rearrangements	26

CONTENTS

15. Pyrolysis	35
16. Spectral properties	36
A) Infrared spectra	36
B) Mass spectra	37
ORIGINAL WORK:	
<u>PART. I</u>	
NEW SYNTHESIS OF N-[PHTHALIMIDO]-ACETOXY, <u>o</u> -, <u>m</u> -,and <u>p</u> -BENZOYLOXY PHTHALIMIDES	39
<u>PART. II:</u>	
REACTIONS OF N-[PHTHALIMIDO]-ACETOXY PHTHALIMIDE	42
1. Hydrolysis	42
2. Base catalyzed ring opening	44
3. Acid catalyzed ring opening	55
<u>PART. III:</u>	
REACTIONS OF N-[phthalimido]- <u>o</u> -, <u>m</u> -, and <u>p</u> -BENZOYLOXY PHTHALIMIDES	61
1. Hydrolysis	61
2. Base catalyzed ring opening	62
3. Acid catalyzed ring opening	71
