

CONTENTS

CHAPTER I

Introduction	page
1- The Rate of a chemical Reaction in solution	1
2- thermodynamic parameters of. activation	2
3- InfUlences of substituent	4
4- Electrostatic Theory of Medium Effect	7
5- Influence of solvent structure	13
6- Litereature Review and objectives of the present study	16

CHAPTER II

Kinetics of dehydrochlorination of 1,1,1-trichloro-2,2-diarylethanes by methoxide ion in tiethanol-carbon tetrachloride mixed solvent's

A. Experimental

1- Materials	20
2- Determination of the reaction rates	23

B- Results and Discussion.

1- Reaction mechanism and rate constant calculation	24
2- Activation parameters	29
3- Solvent effects on the rates of dehydrochlorination reaction	44
