Introduction	1
Chapter I	
FUNCTION APPROXIMATIONS	
§ 1.1 Introduction	4
§ 1.2. Rational Functions Approximation	5
§ 1.3. Padé Approximants	6
1.3.1. Padé Approximants for Functions Whose Taylor Series Has an Infinite Radius of Convergence	7
1.3.2. Padé Approximants for Functions Whose Taylor Series Has a Finite Radius of Convergence	9
1.3.3. Finite Difference Schemes Via Padé Approximations of Exponential Function of Matrices	10
§ 1.4. Restrictive Padé Approximation	13
1.4.1. Unique Solvability of Restrictive Padé Approximation	17
1.4.2. Restrictive Padé approximation of the Exponential Matrix	18
§ 1.5. Spectral and Pseudo-spectral Methods	20
1.5.1. Introduction to spectral methods	20
1.5.2. Differentiation	23
1.5.3. Sobolev Norms	24
1.5.4. Spectral Interpolation	25
1.5.5. Chebyshev Method	26
1.5.6. Accuracy of the Chebyshev Approximation	28

Chapter II

RESTRICTIVE PADÉ APPROXIMATION FOR THE SOLUTION OF SOME PARTIAL DIFFERENTIAL EQUATIONS

1- The Linear Schrödinger Equation in One Dimension	31
2- The Linear Schrödinger Equation in Two Dimensions	42
3- Schrödinger Equation with Potential as a Function of Position ...	47
4- The Singularly Perturbed Parabolic PDE	50

Chapter III

PSEUDO-SPECTRAL METHODS FOR TWO DIMENSIONAL DIFFUSION EQUATION WITH A NON – LOCAL BOUNDARY CONDITION

§ 3.1. Introduction	56
§ 3.2. Chebyshev Differentiation	57
§ 3.3. Chebyshev Matrix Operator for Integration (El-Gendi Method)	65
§ 3.4. Implementation of the Spectral Difference Scheme	67
§ 3.5. Numerical Tests	68
§ 3.6. Improving the Accuracy	75
