

CONTENTS

ABSTRACT	
ACKNOWLEDGEMENT	
CONTENTS	
LIST OF FIGURES	
CHAPTER ONE: INTRODUCTION	
1.1 General	1
1.2 Location of the study area	1
1.3 The Scope of the Study	3
CHAPTER TWO: GEOLOGICAL SETTINGS OF THE WESTERN DESERT	
2.1. Tectonic Setting	6
2.1.1. Carton and Stable Shelf	8
2.1.2. Unstable Shelf	8
2.1.3. Hinge Zone	8
2.1.4. Miogeosyncline	8
2.2. Stratigraphy	8
2.2.1. Paleozoic	10
2.2.1.1. Pre-Cambrian	10
2.2.1.2. Cambro-Ordovician	10
2.2.1.3. The Silurian	11
2.2.1.4. Devonian	11
2.2.1.5. Carboniferous	12
2.2.1.6. Permian& Teriasic	12
2.2.2. Mesozoic	12
2.2.2.1. Lower Jurassic	14
2.2.2.2. The Middle to Late Jurassic	14
2.2.2.3. Cretaceous	14
2.2.3. Cenozoic	21
2.3.Hydrocarbon Habitat	24
2.3.1. Source rocks	24
2.3.2. Reservoirs	25
2.3.3. Traps, Seals and Migration of oil	26

3.1. Field parameters	28
3.1.1 Surveying and positioning	29
3.1.2. Energy sources	29
3.1.3. Array design	29
3.1.4. Sample rate	30
3.1.5. Geophone groupe interval	31
3.1.6. Shot point interval	31
3.1.7. Number of geophone group	31
3.1.8. Spread length	32
3.2. Processing	32
3.2.1 Pre-processingsteps	33
3.2.1.1. Demultiplexing	33
3.2.1.2. Trace editing	33
3.2.1.3. Gain recovery (True Amplitude Recovery)	34
3.2.1.4. Static correction	35
3.2.1.5. Deconvolution befor stack (prestack)	36
3.2.1.6. Common depth point (CDP) sorting and gothering	37
3.2.1.7. Preliminary stack	38
3.2.2. Processing Analysis	38
3.2.2.1. Velocity Analysis	38
3.2.2.2. Static analysis	39
3.2.2.3. Deconvolution analysis	39
3.2.2.4. Filter analysis	40
3.2.2.5. Ramp analysis	40
3.2.3. Processing steps	41
3.2.3.1. Normal movement correction	41
3.2.3.2. The residual statics	42
3.2.3.3. The Prestack ramp	42
3.2.3.4. CDP stack	42
3.2.3.5. Deconvolution after stack	43

3.2.3.6. Frequency filter	43
3.2.3.7. Final stack	43
3.2.3.8. Migration	43
3.2.4. Application	44
3.2.5. Seismic Interpretation	47
3.2.5.1. Introduction	47
3.2.5.2. Subsurface structural setting of the area	48
CHAPTER FOUR: SHALE ANALYSIS	
4.1 Shale Volume	56
4.1.1 Gamma ray method	56
4.1.2 Neutron method	57
4.1.3 Density-Neutron method	57
4.1.4 Density-Acoustic method	57
4.2 Shale parameter determination	58
4.2.1 GR – DT Crossplot	72
4.2.2 GR - PHIN Crossplot	72
4.2.3 GR – RHOB Crossplot	86
4.2.4 GR – RT Crossplot	86
CHAPTER FIVE: MATRIX CHARACTERISTICS	
5.1 Matrix Volume(V_{ma})	100
5.2 Mineral Identification in the Matrix	100
5.2.1 Dia-porosity technique	100
5.2.2. Tri-porosity technique	101
5.3. Application on the Studied Formations	102
5.3.1. The Upper Bahariya Formation	102
5.3.2. The Lower Bahariya Formation	116
CHAPTER SIX: POROSITY AND FLUID SATURATION	
6.1. Porosity Determination	130
6.1.1. Density log	130
6.1.2. Neutron log	131
6.1.3. Sonic log	133
6.1.4. Effective porosity	134

6.2. Water Parameter Determination	134
6.2.1. Formation temperature	134
6.2.2. Correction of the mud filtrate resistivity (Rmf)	135
6.2.3. R _w determination	135
6.3. Fluid Saturation	137
6.3.1. Water Saturation (S _w)	137
6.3.2. Hydrocarbon saturation (S _h)	139
6.4. Applications on the Studied Formations	139
6.4.1. The Upper Bahariya Formation	140
6.4.2. The Lower Bahariya Formation	144

CHAPTER SEVEN: FORMATION AND FLUID ANALYSIS

7.1. Analog of Falouka-1X well	149
7.2. Analog of Harun-1X well	160
7.3. Analog of Kamel-1X well	167
7.4. Analog of NE G.Rissu-1X well	176
7.5. Analog of Sakr-2X well	180
7.6. Analog of Qarun-1X well	189

CHAPTER EIGHT: SUBSURFACE GEOLOGICAL AND PETROPHYSICAL STUDIES

8.1. Subsurface Geology	196
8.1.1. Structure elements	196
8.1.2. Depth maps	197
8.1.3. Isopach maps	197
8.1.4. Lithofacies maps	200
8.1.4.1. The Upper Bahariya Formation	200
8.1.4.2. The Lower Bahariya Formation	202
8.2. Hydrocarbon Potentialities	207
8.2.1. Reservoir rocks	207
8.2.2. Porosity evaluation	207
8.2.3. Reservoir fluids	209
8.2.3.1. The Upper Bahariya fluids	209
8.2.3.2. The Lower Bahariya fluids	210
8.2.4. Cap rocks	214

CHAPTER NINE : SUMMARY AND CONCLUSIONS

9.1. Interpretation of Seismic data 215

9.2. Well logging Analysis 217
