CHAPTER		
I	INTRODUCTION	1
II	EXPERIMENTAL TECHNIQUE	
2.1	Sample preparation	4
2.2	Annealing procedure	4
2.3	Dielectric constant and A.C measurements	5
2.4	D.C measurements	7
2.5	Sample holder	8
III	THEORETICAL REVIEW	
	INTRODUCTION	9
3.1	Band models	10
3.1.1	Simplest band model	11
3.1.2	Mott-CFO model	12
3.1.3	Davis Mott model	13
3.1.4	Marshall-Owen model	14
3.1.5	KAF model	14
3.2	D.C electrical conductivity of amorphous semiconductors	15
3.2.1	Band conduction of electrons above E_c or below E_v	15
3.2.2	Thermal assisted tunneling	16
3.2.3	Tunneling conduction near E_f	17
3.3	Chalcogenide glasses	21
3.3.1	Electronic band structure and transport	22

3.3.2	Defect states and impurities	23
3.4	A.C conductivity	27
3.4.1	Theory of A.C conductivity	27
3.4.2	Quantum Mechanical Tunneling model	28
3.3.3	Overlapping large polaron tunneling model	29
3.3.4	Correlated barrier hopping model	31
3.5	Dielectric properties of glass	33
3.5.1	Theory	33
3.5.2	Polarization in glasses	33
3.5.3	Dielectric loss in glasses	35
3.5.4	The dielectric loss tangent	37
3.5.5	The effect of frequency and temperature on the dielectric loss	39
3.6	Crystallization	44
3.6.1	Glass formation	45
3.6.2	Models of glass formation. "structural and thermodynamic views"	46
3.6.3	Thermodynamics of crystallization	47
3.6.4	Phase transition"glass melting phase---> crystalline phase"	47
3.6.4.1	Nucleation	48
3.6.4.2	Homogenous nucleation	50
3.6.4.3	Hetrogenous nucleation	51
3.6.4.4	Surface nucleation	51
3.6.5	Crystal growth	52
3.6.5.1	Parabolic growth	52
3.6.5.2	Linear growth	53
3.6.6	Crystallization kinetics	54

IV RESULTS AND DISCUSSIONS

4.1	The physical properties of the system Se_{90} Ge_{10-x} In_x in the glassy state	57
4.1.1	The temperature dependence of A.C conductivity	58
4.1.2	The frequency dependence of A.C coductivity	60
4.1.3	The effect of frequency on the dielectric constant	62
4.1.4	The effect of temperature on the dielectric constant	63
4.1.5	The temperature dependence of the dielectric loss tangent(tan δ)	64
4.1.6	The frequency dependence of the dielectric loss tangent(tanδ)	65
4.2	Structure and physical properties of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	68
4.2.1	X-ray structure studies of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	69
4.2.2	The effect of temperature on A.C conductivity of Se_{90} Ge_{10-x} In_x in the crystalline state	70
4.2.3	The effect of frequency on A.C conductivity of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	75
4.2.4	The effect of temperature on the dielectric constant of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	77
4.2.5	The effect of frequency on the dielectric constant of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	79
4.2.6	The effect of frequency on the dielectric loss tangent of $Se_{90}Ge_{10-x}In_x$ in the crystalline state	80

4.2.7 The effect of temperature on the dielectric loss tangent of $Se_{90}Ge_{10-x}In_x$ in the crystalline.state 83

4.3 Disorder -order transformation 84

4.3.1 The effect of annealing time on the dielectric constant and dielectric loss tangent of $Se_{90}Ge_{10-x}In_x$ 85

4.4.1 Isothermal crystallization kinetics of $Se_{90}Ge_{10-x}In_x$ 87

4.4.2 Crystallization kinetics using the change in the dielectric constant and dielectric loss tangent 88

4.4.3 The activation energy of amorphous crystalline transformation due to the change in ε and tan δ 90

4.4.4 The effect of crystallization temperature and annealing time on the dimensions of the crystalline domains 92

4.4.5 The effect of crystallization temperature on the diffusion coefficient 93
