## **List of Tables**

**Table-1- Physical and chemical properties of cadmium chloride.**

**Table-2- Determination of the lethal dose of CdCl<sub>2</sub> for 50% of the tested animals, (LD<sub>50</sub>).**

**Table-3- Histopathological alterations of liver of the rats treated with 1/8 LD<sub>50</sub> of CdCl<sub>2</sub>.**

**Table-4- Histopathological alterations of liver of the rats treated with 1/4 LD<sub>50</sub> of CdCl<sub>2</sub>.**

**Table-5- Histochemical changes of the liver carbohydrates, DNA, RNA and total proteins of control rats and others treated with 1/8 LD<sub>50</sub> and 1/4 LD<sub>50</sub> of CdCl<sub>2</sub> .**

**Table-6- Histopathological alterations of kidney of the rats treated with 1/8 LD<sub>50</sub> of CdCl<sub>2</sub>.**

**Table-7- Histopathological alterations of kidney of the rats treated with 1/4 LD<sub>50</sub> of CdCl<sub>2</sub>.**

**Table-8- Histochemical changes of the kidney carbohydrates, DNA, RNA and total proteins of control rats and others treated with 1/8 LD<sub>50</sub> and 1/4 LD<sub>50</sub> of CdCl<sub>2</sub> .**

**Table-9- Chromosomal aberrations in metaphases of bone marrow cells of the rats treated with 1/8 LD<sub>50</sub> of CdCl<sub>2</sub> .**

**Table-10- Chromosomal aberrations in metaphases of bone marrow cells of the rats treated with 1/4 LD<sub>50</sub> of CdCl<sub>2</sub> .**
