Aim of the work

Abstract

CHAPTER 1

Introduction and literature survey

1.1 Definition and classification of ferrite	1
1.2 Preparation of ferrite	4
1.3 Definition of Polymers and Rubber	7
1.4 Definition and classification of polymer-bonded magnets	9
1.4.1 Application of polymer-bonded magnets	9
1.4.2 Classification of polymer-bonded magnets.....	11
1.5 Preparation of polymer-bonded magnets	12
1.6 Historical survey	16

CHAPTER 2

Theoretical Review

2.1 Origin of magnetism.....	24
2.1.1 Types of Magnetic materials	24
2.1.2 Hysteresis loop	25
2.2 Structure of ferrite	28

2.3 Structure and magnetic properties of M phase.....	32
2.3.1 Chemical composition.....	32
2.3.2 Saturation magnetization and coercivity of BaFe ₁₂ O ₁₉	33
2.3.3 porosity.....	34
2.3.4 Isotropic energy	38
2.3.5 Domain structure of ferromagnetic materials	41
2.4 Theory of magnetization measurements.....	43
2.5 Vibrating sample magnetometer.....	45
2.6 Physical properties of polymer composites	47
4.7 Mechanical properties of rubber composites	57
4.8 Dynamic properties of rubber composites.....	62

CHAPTER 3

Experimental Procedures

3.1 Chemical co-precipitation technique	65
3.2 Incorporation of ferrite in natural rubber.....	65
3.3 X-Ray analysis	69
3.4 Differential thermal analysis	69
3.5 Electron Probe Microanalysis (EPMA) and Scanning Electron Microscope examination (SEM)	69
3.6 Density	70
3.7 Magnetic measurements	71
3.8 Mechanical Measurements	71
3.9 Dynamic measurements	72
3.10 Hardness of composites	72
