I.VV-Test Insect.....	33
II.Methods.....	33
II.1.Mass production of fungi on the tested fungi on different media.....	33
*Efficiency of the fungal isolates as a biological control agents against the Egyptian cotton leaf worm <i>S.littoralis</i> under laboratory conditions.....	34
Diet mixing technique:.....	34
The second insect : <i>Pectinophora gossypiella</i>	35
Toxicological studies.....	35
Isolation and solublization of protein.....	36
II.2.SDS-Polyacrylamide gel.....	36
II.3-Electrophoresis of protein.....	37
II.4-Determination of aflatoxins produced by some fungi.....	38
1-Thin layer chromatography (TLC).....	38
a)Extraction of aflatoxins by TLC.....	38
b)Detection of aflatoxins by thin layer chromatography....	38
2-High performany chromatography (HPLC).....	39
a) Extraction.....	39
b) Clean up: by.....	39
-Column chromatography.....	39

RESULTS.....

Virulence of the studied entomopathogenic fungi (supernatant) against newly hatched larvae of *P.gossypiella*.....41

Virulnce of the tested entomopathogenic fungi (supernatant) against 1st instar larvae of *Spodoptera littoralis*.....54

Virulence of entomopathogenic fungi (supernatant) against against 2nd instar larvae of *S. littoralis*.....66

Electrophoresis patterns of total cellular proteins of the two tested entomopathoenic fungi (*B.brongniartii* and *M.anisopliae*) at different concentrations.....77

Electrophoresis patterns of total cellular proteins of the three tested entomopathoenic fungi (*M.flavovridae*, *P.farinosus* and *B.bassiana*) at different concentrations.....84

Detection of aflatoxins.....91

DISCUSSION.....92

SUMMARY.....99
