	Page
❧ INTRODUCTION AND AIM OF THE WORK.	1
❧ REVIEW OF LITERATURE.	
* Chapter(I):Neonatal septicemia	
- Definition	2
- Pathogenesis and immunology of neonatal infection	2
- Predisposing risk factors of neonatal infection.	10
- Causative organisms	14
- Clinical picture of neonatal infection.	19
- Laboratory diagnosis of neonatal infection	24
- Prevention of neonatal septicemia.	35
- Treatment of neonatal septicemia	37
* Chapter (II): Antimicrobial peptides.	
Families of human antimicrobial peptides.	45
Gene regulation	49
Activities of antimicrobial peptides.	50
Antimicrobial peptides as drugs.	53
Role of antimicrobial peptides in infection.	55
* Chapter (III): Interleukin-6.	
Cytokines and neonatal infection.	56
Biological function of IL-6	60
Interleukin-6 and neonatal infections.	66
❧ PATIENTS AND METHODS.	70
❧ RESULTS.	82
❧ DISCUSSION.	131
❧ SUMMARY AND RECOMMENDATION	151
❧ REFERENCES.	154
❧ APPENDIX.	
❧ ARABIC SUMMARY.
