

## *ACKNOWLEDGEMENT*

I am indebted to ALLAH, the most gracious and the most merciful, the bounties of whom I can never reckon.

This work has been carried out under the supervision and direction of Prof. Dr. H.Y. Olama, Prof. and Head of Botany. Dept., Fac. Science, Banha, El-Zagazig university, Prof. Dr. Bouthaina, F. Abd El-Ghany, Prof and Head of Soil Microbiol. Unit, Dept. of Soil Fertility and Microbiology, Desert Res. Center, Dr. M.A. Sweilam, Ass. Prof of Microbiol., Botany. Dept. Fac. Science, Banha, El Zagazig University, and Dr. M.M. Moustafa, Dr. of Microbiology, Botany Dept. Fac. Science, Banha, El-Zagazig University.

Thanks for them for their effective and fruitful discussions, suggesting and supervising this works.

I would like to express my deepest gratitude to and Prof. Dr. M.A. El-Sibaie Prof of Agric. Microbiol., D.R.C. and Prof. Dr. E.A. Saleh, Prof of Agric. Microbiol., Fac. Agric., Ain Shams Univ. for their kind cooperation

I would like to express my sincere gratitude for all the staff members and workers in Unit of Microbiology Unit, D.R.C. for their continuous assistance and supplying all facilities throughout this work.

Last, I would like to express my everlasting gratitude and respect to my husband and my parents for their unlimited patience, continuous support and encouragement.

3.2.6.2.2. Organic carbon	43
3.2.6.2.3. Total nitrogen	43
3.2.7. Microbiological determinations.	43
3.2.8. Parameters of cucumber plants.	44
3.2.9. Disease Severity Index (DSI)	44
3.2.10. Pre and post-emergence-damping off	45
3.2.11. Statistical analysis	45
4. RESULTS	46
4.1. Isolation and identification of <i>R. solani</i>	46
4.2. Activities of N <sub>2</sub> -fixing diazotrophs and actinomycetes isolates	46
4.2.1. N <sub>2</sub> -fixation for diazotrophs	46
4.2.2. Antagonistic effect of isolates against <i>R. solani</i>	55
4.2.3. Root colonization ability for N <sub>2</sub> -fixing diazotrophs and actinomycetes	56
4.2.4. Selection and identification of the most active isolates	59
4.2.5. Effect of inoculation with biocontrol agents on disease severity index (DSI) of cucumber plants infected with <i>R. solani</i>	59
4.2.6. Effect of inoculation with biocontrol agents on the percentage of pre and post emergence damping off and survival of cucumber plants.	69
4.3. Microbial densities.	69
4.3.1. Total microbial counts	69
4.3.2. Total actinomycetes counts	74
4.3.3. Azotobacters densities	77
4.3.4. Azospirilla densities	77
4.4. Plant characteristics	82
4.4.1. Plant height	82
4.4.2. Root length	82
4.4.3. Plant weight	88
4.4.4. Root weight	89
4.4.5. Chlorophyll content	99
4.4.6. Flowering and fruiting	103
4.4.7. Fruits total nitrogen and total protein	103
5. GENERAL DISCUSSION AND CONCLUSION	110
6. SUMMARY	116
7. REFERENCES	121
ARABIC SUMMARY	144

## ***LIST OF TABLES***

No.	Title	Page
1.	Soil Physical and chemical analyses of investigated area 10 <sup>th</sup> of Ramadan.	24
2.	The organic carbon, total nitrogen and related parameters of sheep manure.	24
3.	N <sub>2</sub> fixation and antagonistic activities of azotobacters isolated from different localities cultivated with different crops .	48
4.	N <sub>2</sub> fixation and antagonistic activities of azospirilla isolated from different localities cultivated with different crops .	50
5.	Antagonistic activities of actinomycetes isolated from different localities cultivated with different crops.	52
6.	Effect of inoculation with biofertilizer agents on root colonization of cucumber seedlings.	57
7.	Identification of <i>Azotobacter</i> isolate (Rf).	60
8.	Identification of <i>Azospirillum</i> isolate (K <sub>c</sub> ).	61
9.	Cultural, morphological and physical characteristics of streptomyces isolate (Ncui)	63
10.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the disease severity index (%) of cucumber plants .	66
11.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the Percentage of pre and post emergence damping off and survival of cucumber plants.	70
12.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on total microbial counts in the rhizosphers of cucumber plants .	72
13.	Effect of inoculation with biofertilize agents and infection with <i>R. solani</i> on actinomycetes counts in the rhizosphere of cucumber plants.	75
14.	Effect of inoculaiton with biofertilizer agents and infection with <i>R. solani</i> on <i>Azotobacter</i> counts in the rhizosphere of cucumber plants.	78
15.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on <i>Azospirillum</i> counts in the	80

	rhizosphere of cucumber plants.	
16.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on stem length of cucumber plants.	83
17.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root length of cucumber plants.	85
18.	Statistical main effects of stages, infection with <i>R. solani</i> and biofertilizer agents on stem and root length of cucumber plants.	87
19.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on stem fresh weight of cucumber plants.	90
20.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on stem dry weight of cucumber plants.	92
21.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root fresh weight of cucumber plants.	94
22.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root dry weight of cucumber plants.	96
23.	Statistical main effects of stages, infection with <i>R. solani</i> and biofertilizer agents on stem fresh and dry weight and root fresh and dry weight of cucumber plants.	98
24.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on chlorophyll percentage of cucumber plants.	100
25.	Statistical main effect of stages, infection with <i>R. solani</i> and biofertilizer agents on chlorophyll percentage of cucumber plants.	102
26.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the number of flowers and fruits and weight of fruits of cucumber plants.	104
27.	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on total N and Protein percentage of fruits of cucumber plants.	107

# ***LIST OF FIGURES***

No.	Title	Page
1	Vegetative cells of <i>Rhizoctonia solani</i> (x1000)	47
2	N <sub>2</sub> fixation and antagonistic activities of azotobacters isolated from different localities cultivated with different crops .	49
3	N <sub>2</sub> fixation and antagonistic activities of azospirilla isolated from different localities cultivated with different crops .	51
4	Antagonistic activities of actinomycetes isolated from different localities cultivated with different crops.	53
5	Antagonistic activity of A) <i>Azospirillum lipoferum</i> B) <i>Azotobacter chroococcum</i> C) <i>Streptomyces lydicus</i> against <i>R. solani</i>	54
6	Effect of inoculation with biofertilizer agents on root colonization of cucumber seedlings.	58
7	Vegetative cells of <i>Azotobacter chroococcum</i> (x1000)	62
8	Vegetative cells of <i>Azospirillum lipoferum</i> (x1000)	62
9	Micromorphology of spore chains of streptomyces lydicus	64
10	Electron micrograph of spore morphology of streptomyces lydicus	65
11	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the disease severity index (%) of cucumber plants .	67
12	Effect of inoculation with a biocontrol agents on the cucumber plant infected with <i>R. solani</i>	68
13	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the Percentage of Pre and post emergence damping off and survival of cucumber plants.	71
14	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> : on total microbial counts in the rhizosphers of cucumber plants .	73
15	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on actinomycetes counts in the rhizosphere of cucumber plants.	76

16	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on <i>Azotobacter</i> counts in the rhizosphere of cucumber plants.	79
17	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on <i>Azospirillum</i> counts in the rhizosphere of cucumber plants.	81
18	Effect of inoculation with biofertilizer agent and infection with <i>R. solani</i> on stem length of cucumber plants.	84
19	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root length of cucumber plants.	86
20	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on stem fresh weight of cucumber plants.	91
21	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on stem dry weight of cucumber plants.	93
22	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root fresh weight of cucumber plants.	95
23	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on root dry weight of cucumber plants.	97
24	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on chlorophyll percentage of cucumber plants.	101
25	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on the number of flowers and fruits of cucumber plants	105
26	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on total weight of fruits of cucumber plants.	106
27	Effect of inoculation with biofertilizer agents and infection with <i>R. solani</i> on total N and Protein percentage of fruits of cucumber plants.	108
