

Contents

Acknowledgment.....	1
Introduction and aim of the work.....	2
Anatomy of the thoracic wall.....	7
☆ The bony skeleton	
☆ Musculature of the thoracic wall	
☆ Skin and subcutaneous tissue of the chest wall	
Indications for chest wall reconstruction.....	15
Types and methods of chest wall reconstruction.....	16
☆ Reconstruction for neoplasms	
☆ Reconstruction for infection	
☆ Reconstruction for radiation injury	
☆ Reconstruction for trauma	
Chest wall stabilization.....	33
☆ Indications for stabilization	
☆ Materials used in chest wall stabilization	
☆ Methods of implantation	
Soft tissue reconstruction.....	51
☆ Planning the reconstruction	
☆ Flaps for reconstruction	
Disorders of the sternum and the thoracic wall.....	94
☆ Pectus excavatum	
☆ Sternal fissure	
☆ Poland's syndrome	
☆ Thoracic dystrophy	
☆ Pectus carinatum	
Asymmetric congenital deformity or the ribs (collapse of the right side of the chest).....	137
References.....	138
Summary.....	169
