	Page
INTRODUCTION AND AIM OF THE WORK	1
REVIEW OF LITERATURE	3
Anatomy of the conduction system	3
Cardiac action potential	9
Terminology and classification of supraventricular tachyarrhythmias	19
Mechanisms of supraventricular tachyarrhythmias in children	21
Etiology of supraventricular tachyarrhythmias	38
Hemodynamic function in arrhythmias	40
Arrhythmias and Sports	50
Approach to the diagnosis of supraventricular tachyarrhythmias	59
- Clinical recognition	60
- Non invasive assessment	64
- Invasive diagnostic techniques	85
Treatment of supraventricular tachyarrhythmias ...	116
- Pharmacology of antiarrhythmic drugs	117
- Antitachycardia pacemakers	123
- Cardioversion and defibrillation	134
- Surgical treatment of tachyarrhythmias	139
- Catheter ablation of dysrhythmias	151
Approach to treatment of supraventricular tachycardia	154
Approach to treatment of atrial fluttre	163
Approach to treatment of atrial fibrillation	165
Fetal supraventricular tachyarrhythmias	167
Neonatal supraventricular tacharrhythmias	176
