

Contents

• Acknowledgments	
• Lists of :	
○ Figures -----	i-ii
○ Tables -----	iii-iv
○ Boxes -----	v
• Review of literature	
• Introduction and Aim of the Study -----	I-II
• Anatomy and Embriology of the Breast -----	1- 14
• Physiology of the Breast -----	15-19
• The Endocrinology of the Breast Cancer -----	20-24
• Epidemiology of the Breast cancer -----	25-38
• Genetic Basis for the Emergence and Progression of the Breast cancer -----	39-43
• Molecular Biology of the Breast Cancer -----	44-50
• Pathology of the Breast cancer -----	51-98
○ Etiology of the Breast cancer on biological basis -----	51-56
○ Pathogenesis of the Breast Cancer -----	57-60
○ Growth and Microscopic pathology -----	60-77
○ Staging of the Breast Cancer -----	77-84
○ Prognostic Factors for the Breast Cancer -----	84-98
• Screening (Early Detection) for Breast Cancer -----	99-110
• Diagnosis of Early Breast Cancer -----	111-149
• Prevention of the Breast Cancer -----	150-170
• Management of In Situ Carcinoma of the Breast -----	171-183
• Management of Early Invasive Carcinoma (TNM Stages I and II) -----	184-220
• The Role of Radiotherapy in Breast Cancer Management -----	221-232
• Adjuvant Systemic Therapy for Primary Breast Cancer -----	233-241
• Role of Adjuvant Endocrine Therapy -----	242-255
• Summary -----	256-257
• References	
• Arabic Summary
