INTRODUCTION	1

LITERATURE REVIEW

1-Algal flora of rice fields	3
2-Response of soil algae to pesticides	6
3-Toxicological effects of herbicides on microalgae	14
a- Field toxicity experiments	14
b-Laboratory toxicity experiments	16
-Thiobencarb	27
-Simazine	33
-Pendimethalin	35
4-Environmental factors affecting herbicide toxicity to algae	36
5-Pesticides uptake and degradation by algae	44

MATERIALS AND METHODS

<i>Field study</i>	47
Herbicides treatment	47
Bold's basal medium	49

BG-11 medium	50
Analysis of physical and chemical characters	50
<i>Laboratory study</i>	51
1-Organisms and culture conditions	51
2-Herbicide assay	56
3-Algal recovery	57
4-Growth (Biomass) measurements	58
a-Turbidity	59
b-Cell counting	59
c-Dry weight	59
d-Chlorophyll <i>a</i>	59
e-Protein content	61
f-Total carbohydrates content.....	62
5-Photosynthetic measurements	64
6-Fluorescence measurements at 77 K	65
7-Herbicides uptake by algae	67
Thiobencarb residue measurements	67
8-Statistical analysis	69

EXPERIMENTAL RESULTS

<i>Field study</i>	70
Physico-chemical analysis of rice field soil	70

Algal flora of rice fields.....	71
Response of algal flora to herbicides at Qalubia rice field during 1994.....	72
a-Tolerance response	72
b-Stimulatory response	72
c-Inhibitory response	73
Laboratory study	88
I-Herbicide treatment and recovery	88
1-Effect of thiobencarb on <i>Protosiphon</i> and its subsequent recovery	88
2-Effect of thiobencarb on <i>Anabaena</i> and its subsequent recovery	93
3-Effect of simazine on <i>Protosiphon</i> and its subsequent recovery	97
4-Effect of simazine on <i>Anabaena</i> and its subsequent recovery	101
5-Effect of pendimethalin on <i>Protosiphon</i> and its subsequent recovery ...	105
II-Nitrate effect on herbicide toxicity	109
1-Nitrate effect on thiobencarb toxicity to <i>Protosiphon</i>	109
2-Nitrate effect on pendimethalin toxicity to <i>Protosiphon</i>	115
III-Phosphate effect on herbicide toxicity	120
1-Phosphate effect on thiobencarb toxicity to <i>Protosiphon</i>	120
2-Phosphate effect on thiobencarb toxicity to <i>Anabaena</i>	126
3-Phosphate effect on pendimethalin toxicity to <i>Protosiphon</i>	131
IV-Herbicides uptake by algae	136
1-Thiobencarb uptake by <i>Protosiphon</i>	136
2-Thiobencarb uptake by <i>Anabaena</i>	137
