LIST OF TABLES

ም- ዜ ነል	Nic	Page
Table	Results of routine investigation including conventional blood	
1.	culture and widal test done in 191 typhoid cases	56
	culture and widal test done in 151 typhoto culture and	
2.	The relation between results of conventional blood culture and	57
	widal test in 191 typhoid cases	57
3.	Salmonella typhi somatic Antibodies (T.O) and flageller	
	antibodies (T.H) Titres Among 191 typhoid cases Examined by	
	widal test	58
4.	Comparison between isolation rates of salmonella strains from	
••	112 studied cases using conventional blood culture and isostate	
	culture techniques	58
5.	Comparison between isolation rates of salmonella strains from	
٦.	100 studied cases using conventional blood culture & Bile	
	streptokinase culture	59
	Comparison between rates of isolation of salmonella strains	
6.	Comparison between rates of isolation of summer within 7 days	
	using different blood culturing technique within 7 days	60
	incubation	-
7.	Average time consumed by culture techniques related to that of	~ 1
	conventional blood culture	61
8.	Salmonella strains isolated by stool culture from 60 typhoid	
	cases in relation to history of fever before hospitalization	61
9.	Tulumter Culture Techniques	62
10	• • • • • • • • • • • • • • • • • • •	. 62

LIST OF FIGURES

		Page
Figur	es No.	_
1.	Isolation of Salmonella Typhi conventional Blood culture and	
	Widal test	63
	Incidence of Antibodies Against Salmonella typhi somatic (TO)	
2.	Incidence of Antibodies Against builded Tost	64
	and Salmonella typhi Flageller (TH) Using Widal Test	
3.	Isolation of Sensitivity of Salmonella strains on different blood	
J.	culture media and Related Percentage	65
	culture media and resident and resident strain using Blood agar culture	
4.	Isolation of Salmonella Typhi strain using Blood agar culture	66
	and Bile streptokinase culture	00
5.	Isolation Rate of Salmonella Strains on different Blood Culture	
٦.	through out 7 Days	67
	through out / Days the state of culture in relation to the	
6.	Salmonella strains isolated using stool culture in relation to the	68
	history of fever	
7	Evaluation of culture media sensitivity to growth of Salmonella	l
7.		
	strains	70
8.	Antibiotic sensitivity pattern of salmonella strains	, 0
