INTRODUCTION	1
CHAPTER ONE	
1. LITERATURE REVIEW	4
1.1 Disproportionation of toluene.	4
1.1.1. Mechanism of disproportionation reaction.	4
1.1.2. Disproportionation of toluene on different types of zeolites.	7
1.2. Structures of zeolites (crystalline aluminosilicates).	17
1.2.1. ZSM-5.	18
1.2.2. Mordenite.	22
1.3. Nature of acid sites.	23
1.4. Aluminum content and acidity.	24
1.5. Dealumination of zeolites.	25
1.5.1. Thermal or hydrothermal dealumination of zeolites.	25
1.5.2. Chemical dealumination of zeolites.	25
1.5.2.1. Reactions with acids.	26
1.5.2.2. Reactions with salts.	26
1.5.2.3. Reaction with chelating agents.	26

1.5.2.4. High-temperature reactions with volatile compounds.	27
1.5.3. Combination of thermal and chemical dealumination.	27
1.6. Correlation between dealumination and catalytic properties	28
1.6.1. Preparation method	28
1.6.2. Degree of dealumination	28
1.6.3. Acidity	28
1.6.4. Difusivity and effective pore diameter	29
1.7. Adsorption and diffusion in zeolites	29
1.8. Catalyst deactivation (coke formation)	32

CHAPTER TWO

2. EXPERIMENTAL	33
2.1. Experimental setup and procedures	33
2.1.1. Catalytic procedure and reactor	33
2.2. Catalysts and their preparation	35
2.2.1. ZSM-5 zeolite catalysts	35
2.2.1.1. Cation exchange of the ZSM-5 zeolite	35
2.2.1.2. Dealumination of the ZSM-5 zeolite	35
2.2.1.3. Siliconization of ZSM-5 catalyst	36
2.2.2. Mordenite catalyst	36
2.3. Experimental procedure	36
2.4. Materials	38
2.5. Product analysis	38

CHAPTER THREE

3. RESULTS AND DISCUSSION	39
3.1. Toluene disproportionation reaction over H-ZSM-5 catalyst	39

3.1.1. Effect of siliconization of H-ZSM-5 catalyst on the disproportionation of toluene	49
3.1.2. Effect of dealumination of H-ZSM-5 zeolite on toluene disproportionation	57
3.1.3. Effect of dealumination extent on activities of the siliconized catalyst	63
3.1.4. Effect of siliconization extent on DA-H-ZSM-5 catalyst	71
3.2. Toluene disproportionation reaction over H-Mordenite catalyst	81
3.2.1. Effect of siliconization of H-Mordenite catalyst on the disproportionation of toluene	82
3.3. Three component selectivity of xylene isomers	91
3.4. Kinetic study	96
3.5. Comparison between H-ZSM-5 and H-Mordenite catalysts	104
3.6. X-ray diffraction analysis	109

CHAPTER FOUR

4. CONCLUSIONS	115
