

Contents of the study:

1- Introduction.....	i
2- Embryology of the Menisci.....	1
3- Anatomy of the Menisci.....	8
4- Functions of the Menisci.....	12
5- Mechanics of the Menisci.....	16
6- Mechanism of Meniscal Tear.....	24
7- Classification of Meniscal Lesions.....	27
8- Diagnosis of the Meniscal Lesions.....	30
I-Clinical Diagnosis.....	31
II-Radiological Examination.....	42
III-Arthroscopy of the Knee.....	45
IV-Other Dignostic Studies.....	56
9- Meniscal Transplantation.....	57
I- Historical Review	57
II- Indications of Meniscal Transplantation.....	62
III- Techniques of Meniscal Transplantation.....	68
IV- After Treatment.....	75
V- The Fate of the Meniscus Cartilage Afre Transplantation Cryopreserved NonTissue- Antigen-Matched Allograft.....	77
VI- The Effect of Allograft Meniscal Replacement on Intra-Articular Contact Area and Pressure in the Human Knee.....	80
VII- Complications of Meniscal Transplantation.	81
VIII- Results.....	83

10- Summary.....	88
11- References.....	89
12- Arabic summary.....
