

Contents

	Page
Chapter I: Introduction	1
Chapter II: Mechanical properties of used materials	4
Basic principles	4
Material failure	12
Chapter III: Varieties of implantable materials	16
Metallic implants	16
Non metallic implants	19
Composites	22
Chapter IV: Basic biomechanical properties of bones	25
Chapter V: Basic principles of design of implants	34
General principles of design.	34
Basic principles of design of isoelastic implants.	38
Chapter VI: Examples of isoelastic implants.	40
I- RM –isoelastic cementless total hip prosthesis.	40
II- The isoelastic prosthesis of the shoulder.	64
III- RM-isoelastic total elbow prosthesis.	69
IV- The isoelastic cementless finger prosthesis.	73
Chapter VII: English summary	76
Chapter VIII: References	78
Chapter IX: Arabic Summary	-
