CHAPTER ONE :	(1)
INTRODUCTION:	(1)
Electroplating of metals.....	(4)
Mechanisms of kinetics of the nucleation process.....	(6)
Properties of electroplated metals.....	(12)
A- Brightness	(12)
B- Reflectivity.....	(12)
C- Roughness and pitting.....	(13)
D-Porosity.....	(13)
E- Adhesion and surface preparation.....	(14)
F- Ductility.....	(14)
G-Internal stress.....	(14)
H-Microhardness of the electrodeposition.....	(15)
Properties of baths.....	(16)
A-Stability.....	(16)
B-Cathodic current efficiency.....	(16)
C-Throwing power.....	(17)
Morphology of electrodeposits.....	(20)
Electroplating of alloys.....	(21)
Types of the electroplating processes.....	(23)
A-Regular codeposition.....	(23)
B-Irregular codeposition.....	(23)
C-Equilibrium codeposition.....	(24)
D-Anomalous codeposition.....	(24)
E-Enduced codeposition.....	(24)
Factors affecting the microstructure of electrodeposited alloys.....	(25)
Anodic linear stripping voltammetry for characterization of.....	(28)
alloys electroplating process	
Electroplating of Tin.....	(30)
Electroplating of Nickel.....	(31)
Electroplating of Tin-Nickel alloys.....	(34)
Uses of tin- nickel alloys.....	(34)
CHAPTER TWO	(40)
EXPERIMENTAL TECHNIQUES	(40)
Baths.....	(40)
Electrodes.....	(40)

	Page
Cathodes.....	(40)
Anodes.....	(41)
Reference electrode.....	(41)
Electroplating cell.....	(41)
Electrical circuits.....	(42)
Circuit for electrodeposition.....	(42)
Circuit for potentiodynamic cathodic polarization measurements....	(42)
Circuit for anodic linear stripping voltammetry measurements.....	(43)
Circuit for current transient measurements.....	(43)
Circuit of throwing power and throwing index.....	(43)
Experimental procedure.....	(43)
Cathodic polarization curves.....	(44)
Scanning electron microscope examinations.....	(44)
X-ray diffraction measurements.....	(44)
Anodic linear stripping voltammetry.....	(45)
Potentiostatic current- time measurements.....	(45)
Throwing power and throwing index	(45)
Cathodic current efficiency.....	(46)
Microhardness (V.H.N) of deposits.....	(48)
<u>CHAPTER THREE</u>	(54)
Electroplating of Tin.....	(54)
Potentiodynamic cathodic polarization curves.....	(54)
Cathodic current efficiency.....	(57)
Anodic linear stripping voltammetry.....	(58)
Current-time transient.....	(60)
Microhardness of the deposits.....	(62)
X-ray of tin deposits.....	(62)
Surface morphology of tin deposits.....	(63)
Throwing power and throwing index of the acid chloride bath.....	(65)
<u>CHAPTER FOUR</u>	(93)
Electroplating of Nickel.....	(93)
Potentiodynamic cathodic polarization curves.....	(93)
Cathodic current efficiency.....	(96)
X-ray of nickel deposits.....	(97)
<u>CHAPTER FIVE</u>	(106)
Electroplating of Tin-Nickel Alloys.....	(106)
Potentiodynamic cathodic polarization curves.....	(106)
Cathodic current efficiency.....	(119)
