Summary.....	i
Aim of the work.....	ii
Chapter 1 Theoretical Background.....	
1.1 Introduction.....	1
1.1.1 Dielectric Gases.....	1
1.1.2 Polarity Classification.....	3
1.1.3 Refractive Index and Optical Permittivity.....	5
1.1.4 Characteristic Impedence.....	7
1.1.5 The Dielectric Susceptibility.....	8
1.1.6 Polarizability and Clausius Mosotti Equation.....	10
1.1.7 Specific and Molar Refractivity.....	12
1.1.8 Lorentz- Lorenz Equation.....	14
1.1.9 Molecular Radius.....	16
1.2 Transport Coefficients.....	17
1.2.1 Introduction	17
1.2.2 An ultra Simplified Kinetic Theory of Dilute Gases.....	17
1.2.3 Rate of Molecular Collision.....	18
1.2.4 The Mean Free Path.....	19
1.2.5 Flux of Molecular Collisions.....	21
1.2.6 Values of Transport Coefficients.....	25
1.3 Dispersion.....	27

Contents

1.3.1 Introduction	27
1.3.2 The Normal Dispersion.....	27
1.3.3 Cauchy's Dispersion Equation.....	30
Chapter 2 Interferometry	
2.1 Multiple Beam Interference.....	34
2.1.1 Fabry-Perot Interferometer.....	34
2.2 Two- Beam Interference.....	36
2.2.1 Jamin Interferometer.....	36
2.2.2 Mach-Zehnder Interferometer (MZI).....	39
Chapter 3 Experimental Technique	
3.1 Argon Ion Laser.....	42
3.2 Gas Sample Cell.....	43
3.3 Temperature Control System.....	45
3.4 Pressure Control System.....	47
3.5 Evacuation System.....	49
3.6 Setup of MZI.....	49
3.7 Performance of MZI.....	50
3.8 Measurements.....	51
Chapter 4 Results and Discussion	
4.1 Refractive Index Measurements.....	54
4.1.1 Introduction.....	54
4.1.2 Determination of the Refractive Index.....	54
