

CONTNETS

	Page
Chapter I : Introduction and theoretical background:	
1. Introduction.....	
(1.1) Basic concepts of polymer	1
(1.2) Thermoplastic elastomers.....	6
2 Effect of radiation on polymeric system.....	10
(2.1) Cross linking and degradation.....	10
(2.2) Gas Evolution and Unsaturation.....	11
3 Types and sources of radiation.....	11
 2. Theoretical back ground.....	 13
(2.1) Conduction mechanism in amorphous solid.....	
(2.1.1) Hopping conduction.....	13
(2.1.2) Conduction in extended states.....	15
(2.2) AC conduction in amorphous solids.....	15
(2.2.1) Quantum Mechanical Tunneling (QMT) Model...	18
(2.2.2) Correlated Barrier Hopping (CBH) Model	19
(2.3) Dielectric properties of polymers.....	
(2.3.1) Source of polarizability.....	19
(2.3.2) Dielectric Behaviour of Polymer.....	21
(2.3.3) Dielectric Relaxation in Solid Polymers.....	25
(2.3.4) Thermal Activation of Dipolar Relaxation.....	27
(2.4) Mechanical properties of polymeric materials	28
(2.4.1) Stress-strain tests.....	29
(2.4.2) Young's Modulus	31
(2.5) Thermal analytical techniques.....	32

(2.5.1) Thermogravimetric (TGA).....	33
(2.5.2) Differential Scanning Calorimeter (DSC).....	33
Chapter 2 Literature Review.....	
1. Rubber plastic Blend.....	34
2. Physical properties.....	37
(2.1) Morphological structure investigation.....	37
(2.2) Mechanical and thermal investigation.....	39
3. Spectroscopic analysis.....	43
(3.1) FTIR analysis.....	45
(3.2) Electrical and dielectric properties.....	45
4. Effect of Radiation.....	5
Chapter 3 : Experimental technique.....	
1. Materials	55
(1.1) Polymers and poly functional monomers.....	55
(1.2) Sample preparation	56
(1.3) N1CRRT Electron Beam Accelerator and Irradiation Process	56
2. Physical - Chemical Properties.....	60
(2.1) Mechanical properties.....	61
(2.2) Thermal analysis.....	62
(2.3) Gel Percent Method.....	62
(2.4) Spectroscopic Analysis.....	63
Chapter 4 : Result and Discussion.....	63
1. Morphology studies.....	63
2. Tensile properties.....	67
(2.1) Effect of blend ratio.....	67

(2.2) Effect of different compatibilizers.....	69
3. Gel properties.....	
4. Thermal stability measurements.....	
(4.1) Thermogravimetric analysis.....	76
(4.2) DSC measurements.....	82
5. FTIR spectroscopic investigation.....	85
6. Effect of electron irradiation of mechanical properties of HAF black loaded PP/NBR	
(6.1) Stress-strain test.....	87
(6.2) Stress at break.....	91
(6.3) Elongation at break.....	93
7. Electrical properties.....	
(7.I) Frequency and temperature dependence of total conductivity for unirradiated and irradiated (Blend /carbon) composites	97
(7.II) Effect of frequency , temperature and electron beam irradiation on the dielectric permitivity of NBR/PP carbon black loaded rubber.	105
(7.III) Effect of frequency, temperature and electron beam irradiation on dielectric loss of NBR/PP carbon black loaded rubber.....	114
Conclusion.....	121
References.....	122
Arabic Summary
