

CONTENTS

INTRODUCTION AND AIM OF WORK	1
REVIEW OF LITERATURE	
- Historical	4
- Development of the heart.	9
- Embryology of the ductus	15
- Foetal circulation.	18
- Anatomy and histology of the ductus.	21
- Normal closure of the ductus arteriosus.	23
- Pharmacological closure of the ductus arteriosus.	26
- Aetiology of patency of the ductus arteriosus.	30
- Clinical application of prostaglandins in ductus arteriosus.	36
- Benefit of patency of the ductus arteriosus.	41
- Haemodynamics of patent ductus arteriosus.	42
- Classification of patent ductus arteriosus.	46
- Clinical manifestations of patent ductus arteriosus.	47
- Electro-cardiography.	54
- Roentgenography.	56
- Echocardiography.	59
- Cardiac catheterization.	64
- Angiocardiography.	70
- Diagnosis of patent ductus arteriosus.	73
- Treatment of patent ductus arteriosus.	78
- Surgical treatment of patent ductus arteriosus.	82
- Associated cardiac anomalies with patent ductus arteriosus	88
- Associated extracardiac anomalies with patent ductus arteriosus.	93
