|------------------------------------|------|
| I Introduction and aim of the work | 1    |
| II Review of Literature            |      |
| * The T lymphocyte system          | 2    |
| * The B lymphocyte system          |      |
| - B lymphocytes                    | 18   |
| - Immunoglobulins                  | 21   |
| * Hepatitis B virus                | 30   |
| * Hepatitis delta virus            | 68   |
| * Non-A, Non-B hepatitis           | 69   |
| * Chronic hepatitis                | 77   |
| - Chronic persistent hepatitis     | 80   |
| - Chronic lobular hepatitis        | 87   |
| - Chronic active hepatitis         | 89   |
| * Hepatic schistosomiasis          | 105  |
| * Hepatic cirrhosis                | 130  |
| III Materials and Methods          | 155  |
| IV Statistical analysis            | 172  |
| V Analysis of results              | 175  |
| VI Discussion                      | 216  |
| VII Summary                        | 239  |
| VIII Recommendations               | 246  |
| IX References                      | 248  |
| X Arabic summary                   |      |
