Introduction	1
CHAPTER (1)	
Concept on Lie Group of Transformations and Infinitesimal Transformations	
1.1. One-Parameter Lie Group of Transformations	10
1.2. Infinitesimal Transformations	11
1.3. Infinitesimal Generators.....	12
1.4. Extended Transformations (Prolongations).....	13
1.5. Extended Infinitesimal Transformations - One Dependent and (n) Independent Variables.....	14
1.6. Lie Algebras	17
1.7. Invariance of a Partial Differential Equation	18
1.8. Symmetry Group of Transformations	20
1.9. Invariant Solutions	21
1.10. Classification of Group-Invariant Solutions	23
1.11. Similarity Reductions from the Non-Classical Method	24

CHAPTER (2)

New Classes of Similarity Solutions of the Inhomogeneous Nonlinear Diffusion (IND) Equation

2.1. Introduction	27
2.2. The Infinitesimals of the INDE	28
2.3. The Lie Algebra and the Optimal System.....	31
2.4. Group-Invariant Solutions	32
2.5. The Non-Classical Solution of the INDE	44
2.6. Summary	50

CHAPTER (3)

Similarity Solutions for a Nonlinear Model of Heat Equation

3.1. Introduction	52
3.2. Lie Algebra	55
3.3. Group-Invariant Solutions	60
3.4. Conclusion	68

CHAPTER (4)

Classification of the Extended Symmetries of the Inhomogeneous Nonlinear Diffusion Equation

4.1. Introduction	69
4.2. Symmetries and Similarity Reductions	70

4.3. Examples	75
4.4. Conclusion	83

CHAPTER (5)

New Exact Solutions of Heat Conduction in Metals

5.1. Introduction.....	85
5.2. Symmetries Transformation and Similarity Reductions	86
5.3. Explicit Similarity Solutions	92
5.4. Conclusions	97
References	98

Arabic Summary
