Introduction	1
CHAPTER (1)	
Infinitesimal Calculus of Symmetry Groups	8
1.1. One-parameter groups.....	9
1.2. Infinitesimal transformation and group generator..	9
1.3. Invariant functions.....	11
1.4. Lie equations.....	11
1.5. Prolongation of point transformation groups.....	12
1.6. Symmetry groups For differential equations.....	19
1.7. Determine the point symmetries of partial differential equations.....	21
1.8. Lie algebra.....	23
1.9. Method for constructing invariants.....	24
1.10. Mapping of solutions to other solutions from group invariance of a partial differential solutions.....	26
1.11. Classification of Group-invariant solutions.....	27
CHAPTER (2)	
Analytic Solutions for Asymmetric Model of a Rod in a Lattice Fluid	29
2.1. Introduction and survey.....	29
2.2. Formulation.....	32
2.3. Infinitesimal transformations.....	33
2.4. The Lie algebra and the optimal system.....	37
2.5. Group transformations.....	38

2.6. Similarity variable and reduction equations.....	39
2.7. Reductions to ordinary differential equations.....	41
2.8. Qualitative features of some exact solutions.....	58
2.9. Discussion and concluding remarks.....	62

CHAPTER (3)

On the porous Medium Equation with Modified

Fourier's Law: Symmetries and Integrability	66
3.1. Introduction.....	66
3.2. Physical and mathematical background.....	67
3.3. Symmetries and similarity reductions.....	71
3.4. Symmetry reductions to ordinary differential equations of the porous medium equation.....	80
3.5. Integrability of the reduced to ordinary differential equations and explicit solutions	86
3.6. Concluding remarks	93

CHAPTER (4)

New Families Similarity Reductions of the (1+2)- Dimensional

Nonlinear Schroedinger (2D-NLS) Equation	94
4.1. Introduction	94
4.2. Symmetry transformation and transformation group.....	95
4.3. Similarity reductions.....	101
4.4. Reductions to ordinary differential equations.....	106
4.5. Similarity solutions.....	115
4.6. Conclusion.....	119

CHAPTER (5)

On the dispersion phenomena in porous Media:

Some new exact solutions 120

- 5.1. Introduction.....120
- 5.2. The dispersion and governing equation.....123
- 5.3. Lie Algebra.....125
- 5.4. Similarity variable and reduction equations.....130
- 5.5. Reductions to ordinary differential equations.....131
- 5.6. Conclusion149

References.....151
