

## CONTENTS

	<u>Page</u>
CHAPTER 0 : INTRODUCTION	1
CHAPTER I : THE GENERAL ORDINARY QUASI - DIFFERENTIAL EXPRESSIONS	16
I.1 Quasi - Differential Expressions	16
I.2 The Adjoint of Quasi - Differential Expressions	20
CHAPTER II : THE REGULAR PROBLEM	34
II.1 Preliminaries :	34
II.1.1 The Maximal and Minimal Operators	34
II.2 The Operators in the Regular case :	36
II.2.1 Properties of the Maximal and Minimal Operators	36
II.2.2 Characterization of the Regularly Solvable Extensions	47
CHAPTER III : THE SINGULAR PROBLEM	58
III.1 Preliminaries :	58
III.1.1 Conditions on the Coefficients of the Differential Expressions M	58
III.1.2 The Operators $T'_0(M)$ , $T(M)$	58
III.2 The Operators in the Singular case :	59
III.2.1 Investigation of the Properties of the Minimal Operators	59
III.2.2 The Relation between the Deficiency Indices of $T_0(M)$ and $T_0(M^+)$	67
III.2.3 General Remarks Concerning the Existence of the Extension Operators	77
III.2.4 Characterization of the Regularly Solvable Extensions	79

	<u>Page</u>
III.3 Properties of Quasi - Differential Equations	89
III.3.1 Properties of the Solutions of a Homogeneous Equation	89
III.3.2 Solutions of an Inhomogeneous Equation	90
III.3.3 Boundedness of Solutions	100
III.3.4 $L^2_w$ - Boundedness	103
III.3.5 The Resolvents of Well - Posed Extensions of General Ordinary Quasi - Differential Operators	110
III.3.6 The Essential Spectra of Well - Posed and Regularly Solvable Extensions of the Minimal Operator $T_0(M)$	123
Chapter IV : BOUNDARY CONDITIONS FOR GENERAL ORDINARY QUASI - DIFFERENTIAL OPERATORS AND THEIR ADJOINTS	130
IV.1 Some Technical Lemmas	130
IV.2 The Main Theorems	143
BIBLIOGRAPHY	162
