INTRODUCTION	i
CHAPTER (I) BASIC CONCEPTS	
§ 1.1 Survey on the Previous Work	1
§ 1.2 Auxiliary Results	2
§ 1.3 Auxiliary Definitions, Lemmas, and Estimates	10
§ 1.4 Theorems on the Linear Integral Operator in the Space L_p ($p \geq 1$)	18
§ 1.5 Some Known Quantities	21
CHAPTER (II) AN APPROXIMATE SOLUTION FOR VOLTERRA INTEGRAL EQUATION OF THE SECOND KIND IN THE SPACE L_p ($p \geq 1$)	
§ 2.1 Preliminaries	28
§ 2.2 Auxiliary Definitions and Lemmas	31
§ 2.3 The Approximate Solution and Its Error Bounds	45
§ 2.4 The Results	55
CHAPTER (III) AN APPROXIMATE SOLUTION OF LINEAR INTEGRAL EQUATIONS OF MIXED ADDITIVE TYPE IN THE SPACE L_p ($p \geq 1$)	
§ 3.1 Preliminaries	62
§ 3.2 Auxiliary Facts	63
§ 3.3 The Approximate Solution	72
§ 3.4 The Mixed Equation of the First Kind	77
§ 3.5 On the Approximation of Mixed Additive Integral Equation of Second Kind by Algebraic Polynomials	77
CHAPTER (IV) ON THE APPROXIMATE EVALUATION OF RESOLVENT OF FREDHOLM AND VOLTERRA KERNELS IN THE SPACE L_p ($p \geq 1$)	
§ 4.1 Preliminaries	84
§ 4.2 The Approximate Solution of Fredholm Equation	88
§ 4.3 The Approximate Resolvent of Fredholm Kernel and Its Error Bounds	92

	<u>Page</u>
§ 4.4 The Approximate Resolvent of Volterra Kernel and Its Error Bounds 	95
§ 4.5 The Results 	100
CONCLUSIONS 	104
