GENERAL INTRODUCTION	i
----------------------------	---

CHAPTER I PROPERTIES OF RECORDERS AND SPATIAL MODULATORS

I.1. Holographic Emulsions.....	1
I.1.1. Spectral Sensitivity and Resolution.....	1
I.1.2. Amplitude Hologram.....	4
I.2. Effects of Nonlinearities and Grain Noise	6
I.2.1. Linearity of The Recording Medium	6
I.2.2. Grain Noise	7
I.2.3. Distortion Due To Nonlinearities.....	9
I.3. Modulation Transfer Function - MTF.....	12
I.4. Phase Hologram.....	14

CHAPTER II IMAGE MULTIPLEXING WITH CROSSED GRATING

II.1. Introduction	17
II.2. Previous Work	18
II.3. Aim of The Work.....	24
II.4. Abbe's Theory of Information and Resolution	25
II.4.1. Abbe's Experiment	25
II.4.2. Optical Data Processing	27
II.4.3. Abbe's Theory.....	30
II.5. Spatial Filtering	35
II.5.1. Various Simple Filters.....	35
II.5.2. Phase Contrast.....	39
II.5.3. Matched Filter.....	43
II.5.4. Filtering In Coherent Illumination.....	45

	Page
II.6. Theory of Multiplexing With Crossed Grating.....	47
II.7. Signal - to - Noise Ratio of Decoded Image	53
II.8. Experimntal Results and Discussions.....	58

CHAPER III

CROSS - TALK OF MULTI - IMAGES WITH SPECKLES

III.1. Introduction	66
III.2. Previous Work	67
III.3. Aim of The Work.....	74
III.4. Noise In Hologram	74
III.4.1.Noise In Fourier Transform Holograms.....	75
III.4.2.Signal -to- Noise Ratio.....	78
III.5. Gabor Hologram. Case Where The Object is a Simple Luminous Point.....	80
III. 6. Modulated Speckle Pattern as A Random Carrier For Optical Processing.....	82
III.6.1.One Signal.....	82
III. 6.2.Tow Signals	83
III.7. Theory of Cross - Talk.....	85
III.8. Exprimntal Results and Discussion	87

CHAPER IV

IMAGE SUBTRACTION

SECTION (A) : IMAGE SUBTRACTION WITH SPECKLES

IV. A.1. Introduction	90
IV. A.2. Previous Work	91
IV. A.3. Aim of The Work	96
IV. A.4. The light Distribution In The Image Plane.....	95
IV. A.5. Improving The Profile of The fringes And The Quality of The Images.....	97
IV.A.6. Image coding And Decoding	99
IV.A.7. Image Multipixing By Superposition of Latterally Shifted Speckle Pattern.....	100

	Page
IV. A.8. Image Multiplexing With Oriented Speckle Pattern.....	101
IV. A.9. Theory of Detection of The Difference Between Two Images • An Improved Method	102
IV.A.10.Experimental Technique and Results.....	106

SECTION (B)

IMAGE SUBTRACTION BY USING SELF - IMAGING

IV. B.1. Introduction	108
IV. B.2. Theory of Image Subtraction By Using Self - Imaging of An Amplitude Grating Followed By A Glass Wedge.....	109
IV. B.3. Experimental Technique and Results	112
* GENERAL CONCLUSIONS	114
* REFERENCES	116
* ARABIC ABSTRACT
