<i>Acknowledgements</i>	(i)
<i>Abstract</i>	(ii)
<i>Chapter (1):Introduction</i>	(1)
 <i>Chapter (2):Secondary flow of a viscoelastic fluid between two eccentric spheres</i>	 (7)
2-1.Dynamics of flow	(7)
2-2.Method of approximation	(10)
2-3.First-order approximation	(11)
2-4.Second-order approximation	(14)
 <i>Chapter (3):Solution of the boundary value problem</i>	 (21)
3-1.Secondary flow in eccentric spheres model	(21)
3-2.Determination of Green' s function	(23)
3-3.Determination of the function $\psi^*p(\alpha,\beta,\varphi)$	(26)
3-4.Second-order stream-function $\psi_2(\alpha,\beta)$	(32)
 <i>Chapter(4):Distribution of stresses, forces and tourques at the boundaries</i>	 (36)
4-1.Determination of the relevant Rivlin-Ericksen tensors	(37)
4-2.Evaluation of the surface traction $\underline{s}(\alpha,\beta)$	(40)
4-3.Determination of the resultant forces	(41)
4-4.Determination of the resultant torques	(44)
4-5.Practical rheometrical parameters	(45)

Chapter (5):Construction of the eccentric spheres	
 <i>rheometer</i>	(50)
5-1.Concept of the rheometer	(50)
5-2.Description of equipment	(50)
5-3.Experimental handling and adjustment	(52)
Chapter (6):Results and discussion	(56)
6-1.Results of the theoretical calculations	(57)
6-2.Experimental tests	(67)
Appendix :Bispherical system of coordinates	(81)
