

CONTENTS

a - Inhibitory effects of pesticides - - - - -	4
b- Stimulatory effects of pesticides - - - - -	6
Effect of Pesticides on Some Soil Microorganisms - - - - -	7
a - Effect of pesticides on the nitrogen fixing microorganisms - - - -	7
b - Effect of pesticides on denitrifying microorganisms- - - - -	9
The Relationship Between Soil Properties and Pesticides - - - - -	10
Effect of Pesticides on the Biological Activities of <i>Azotobacter</i> - - - - -	11
a - The relationship between pesticides and growth - - - - -	11
b - Effect of pesticides on nitrogen fixation - - - - -	12
1 - stimulatory effect - - - - -	13
2 - inhibitory effect. - - - - -	13
c - Effect of pesticides on the biosynthesis of vitamin C and indole-3- acetic acid. - - - - -	14
The Degradation of Insecticides.- - - - -	15
a - Biodegradation by living cells. - - - - -	16
b - Biodegradation of pesticides in cell - free extract cultures.- - - -	16
c - Degradation and persistence of pesticides in soil.- - - - -	17

CHAPTER II
MATERIAL AND METHODS

I - MATERIAL	20
Soil Samples-	20
Insecticides	22
Media used	24
 II - METHODS	25
(I) Ecological Determinations	25
Organic carbon	25
Calcium carbonate	26
Carbonate and Bicarbonate	26
Total soluble salts	27
(II) Microbiological Determinations-	28
1- Total microbial flora	28
2- <i>Azotobacter</i> count	29
3 - Denitrifier count	29
4 . a . Isolation and purification of <i>Azotobacter</i>	29
4.b. Identification	30
5 - Determination of the bacterial dry weight	30
6 - Total nitrogen	31
7 - Ammoniacal nitrogen	32
8 - Amino nitrogen	32
9 - Water soluble vitamins	33
9.a. determination of ascorbic acid quantitatively	33
10- Plant growth regulators	33

10.a extraction. - - - - -	34
10.b. paper partition chromatography - - - - -	34
10.c. quantitative determination indole -3- acetic acid - - - - -	35
1 - extraction and purification of IAA - - - - -	35
11- Determination of the insecticides residues - - - - -	36
11.a. in Azotobacter culture and in soils - - - - -	36
11.b. in cell-free extract cultures- - - - -	37

PART II

EXPERIMENTAL RESULTS

CHAPTER I

EFFECT OF CERTAIN INSECTICIDES

ON SOIL BACTERIA

a- Total Bacteria - - - - -	38
b- <i>Azotobacters</i> - - - - -	41
c- Denitrifying Bacteria - - - - -	44

CHAPTER II

EFFECT OF INSECTICIDES ON

SOME SOIL PROPERTIES

1- Organic Carbon - - - - -	47
2 - Calcium Carbonate - - - - -	50
3 - Carbonate contents - - - - -	53
4 - Bicarbonate contents - - - - -	56
5 - Total Soluble Salts- - - - -	59

CHAPTER III
ISOLATION AND THE PRINCIPAL
CHARACTERISTICS OF THE
ISOLATED STRAINS

A- Isolation and Identification - - - - -	62
a - Isolation - - - - -	62
b - The Principal Characteristics of The Isolated Strains- - - - -	62

CHAPTER V
EFFECT OF INSECTICIDES ON BIOLOGICAL ACTIVITY
OF AZOTOBACTER

The Effect on Growth - - - - -	66
The Effect on Total Fixed Nitrogen - - - - -	72
The Effect on Ammoniacal Nitrogen Content - - - - -	78
The Effect on Amino Nitrogen Content - - - - -	84
The Effect on Ascorbic Acid Production - - - - -	90
The Effect on the Biosynthesis of Indole-3-Acetic Acid - - - - -	69

CHAPTER IV
THE PERSISTENCE OF INSECTICIDES

a - Persistence of Insecticides in Cultures of	
<i>Az. chroococcum</i> - - - - -	102
b - Persistence of Insecticides in Cell-Free Extracts of	
<i>Az. chroococcum</i> - - - - -	111
c - Persistence of Insecticides in Inoculated Soil Samples - - - - -	116

PART III

DISCUSSION -----	121
SUMMARY -----	128
REFERENCES -----	132
ARABIC SUMMARY -----
