	<i>Page</i>
Introduction	1
Aim of work	18
Material & Methods	24
Area of study	25
Sampling locations	25
Physico – Chemical analysis	25
Physical analysis	25
1. Temperature	25
2. pH	25
Chemical analysis	25
1. Dissolved Oxygen	25
2. Alkalinity	26
3. Chemical Oxygen Demand	26
4. Ammonium salt	26
5. Dissolved inorganic phosphate	26
Toxicity tests	27
1. Pilot test	27
Plant Fertilizer north unit	28
Plant Fertilizer south unit	29
Misr – Iran of Textile	29
Slaughter house	29
Ammonium chloride	30
Soda ash	30

The raw effluent of north drain	30
The raw effluent of south drain	30
2. Toxicity of 96 h LC ₅₀	31
Histological Observations	32
Results	34
Physical analysis	35
1. Temperature	35
2. PH	36
Chemical analysis	36
1. Dissolved Oxygen	37
2. Alkalinity	38
3. Chemical Oxygen Demand	39
4. Ammonium salts	40
5. Phosphate salts	41
Toxicity tests	42
1. Fertilizer plant (N. unit) 96 h. LC ₅₀	42
2. Fertilizer plant (S. unit) 96 h. LC ₅₀	44
3. Misr –Iran of textile 96 h. LC ₅₀	46
4. Slaughter house 96 h. LC ₅₀	48
5. Ammonia chloride 96 h. LC ₅₀	50
6. Sodium hydroxide 96 h. LC ₅₀	52
7. North drain effluents 96 h. LC ₅₀	54
8. South drain 96 h. LC ₅₀	56
Histological Observations	59
I. Gills	59
Normal gills	59
Treated gills	59

1. Effect of the north drain effluents	59
2. Effect of south drain effluents	64
3. Effect of Misr-Iran Textile effluents	67
4. Effect of Slaughter house effluents	70
II. Liver	73
Normal liver	73
Treated Liver	73
1. Effect of the north drain effluents	73
2. Effect of south drain effluents	76
3. Effect of Misr – Iran of Textile effluents	76
4. Effect of Slaughter house effluents	76
III. Intestine	80
Normal Intestine	80
Treated Intestine	80
1. Effect of the north drain effluents	80
2. Effect of south drain effluents	84
3. Effect of Misr – Iran of Textile effluents	84
4. Effect of Slaughter house effluents	88
IV. Spleen	88
Normal Spleen	88
Treated spleen	88
1. Effect of the north drain effluents	88
2. Effect of south drain effluents	92
Discussion	94
Summary	119
References	126
Arabic Summary
